PART I.

REPORT OF THE SUPERINTENDENT OF STREETS.

PAGES 1 TO 86.

HON. JOSIAH QUINCY,

Mayor of the City of Boston:

SIR: In compliance with the Revised Ordinances, the annual report of the operations and expenses of the Street Department for the year 1897 is herewith respectfully submitted.

ORGANIZATION.

The work of the Department during the past year has been carried on under the same organization that was effected when the consolidated department was created in 1891 and as amended in 1895, the several divisions of the department being as follows:

Central Office.

Boston and Cambridge
Bridges.

Bridge Division.

Ferry Division.

Paving Division.
Sanitary Division.
Sewer Division.
Street-Cleaning Division.
Street-Watering Division.

Each of the above divisions, with the exception of the Central Office and the Boston and Cambridge Bridges, is in charge of a Deputy Superintendent.

The Boston and Cambridge Bridges are managed by two commissioners, the Superintendent of Streets being the commissioner for the city of Boston, the other commissioner being appointed by the Mayor of the city of Cambridge.

More extensive study than is given under this résumé of the year's work, with detail of figures and expenditure, will be found in the division reports of the Deputy Superintendents.

APPROPRIATIONS.

The money assigned for Street Department work the past year was made available under the following appropriations:

First. — Maintenance: At the commencement of the financial year, February 1, the department estimates of the amounts necessary for the proper maintenance of the various divisions are submitted to His Honor the Mayor, who makes such recommendation as he may deem proper to the City Council. The appropriations passed for this purpose were as follows:

Central Office				\$20,000	00
Bridge Division				125,000	00
Cambridge and Boston Brie	dges			14,000	
Ferry Division				220,000	
Paving Division .				660,000	00
Sanitary Division .		•		460,000	00
Sewer Division				300,000	00
Street-Cleaning Division				310,000	00
Street-Watering Division				70,0 0	00
			_		
Total			. \$	2,179,000	00

Second.—Special work done under loan appropriations for permanent improvements: There was made available from loan money, \$25,000 for new or reconstruction work in each of the twenty-five wards, or a total of \$625,000 for all.

In addition to the above amount, balances and orders passed during the year for special items amounted as follows:

Bridge Division.			\$72,525	14
Ferry Division .			8,000	00
Paving Division			386,830	56
Sewer Division .			117,234	38
Total .			\$584,590	08

Third.—In 1891 an Act was passed by the Legislature, entitled, "An Act Relating to the Location, Laying Out and Construction of Highways in the City of Boston." (Chap. 323.) From this fund new streets and sewers assessable on the abutting property are built. The amount expended the past year was:

Streets				\$178,377	53
Sewers				190,697	93
				_	

Four and am entitled, "An Act to Provide for the Laying Carana Construction of Certain Highways in the City of Boston" (commonly known as the Boulevard Act). (Chap. 334 of 1895; Chap. 236 of 1898.) The amount expended this year was as follows:

Streets Sewers			•			\$158,074 46,354	
	Tota	ıl				\$204,429	15

Fifth. — In 1896 an Act was passed by the Legislature, entitled, "An Act Relative to Stony Brook in the City of Boston." (Chap. 530.) \$500,000. The amount expended this year was \$260,741.16.

Sixth.—In 1895 an Act was passed by the Legislature entitled, "An Act Relative to the Establishment of a New Ferry Landing in the City of Boston." (Chap. 435.) \$500,000. The amount expended this year was \$42,296.20.

Seventh. — In 1896 an Act was passed by the Legislature, entitled, "An Act to Provide for a Union Station for Passengers on Railroads entering the southerly part of the City of Boston." (Chap. 516.) The amount expended this year was as follows:

Sewers Streets		:	:	\$87,984 6,885	
				\$94.869	87

Eighth.—In 1897 an Act was passed by the Legislature, entitled, "An Act relative to the Sewerage Works of the City of Boston." (Chap. 426.)

From this fund all "Sewerage Works" are built.

The amount expended the past year was \$464,830.00.

Thus the expenditures under the several appropriations of the year 1897 were as follows:

Maintenance .				•		\$2,245,816	68
Street Improvements	(by	war	ds)			732,597	55
Bridge, specials	•			•	•	39,265	96

Carried forward, \$3,017,680 19

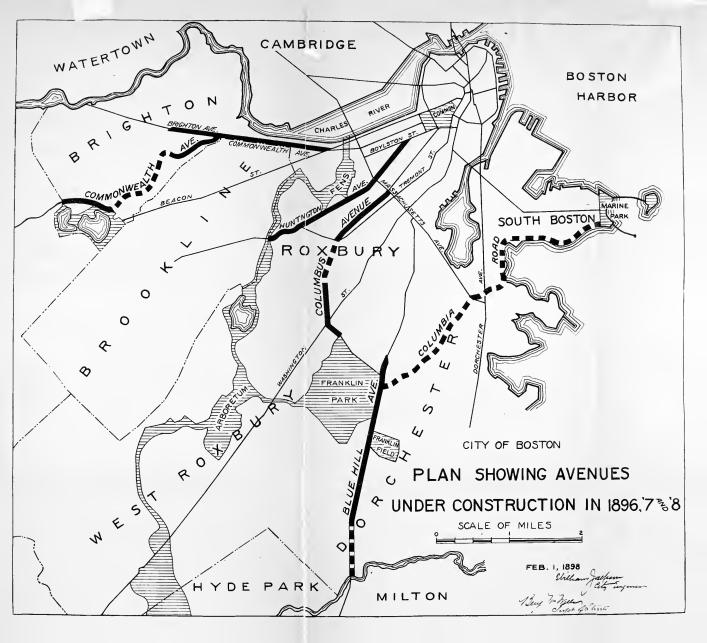

Brought forward	ł,			\$3,017,680	19
Ferry, specials .				5,862	88
Paving, specials				303,097	70
~				114,234	38
Laying Out and Cons				457,323	
Blue Hill and Other					
Act)		-		116,180	78
Stony Brook Improve				260,741	16
New Ferry Landing				42,296	20
South Union Station				94,869	
Sewerage Works				464,830	
8					
Total .				\$4,877,116	99

Construction Work, Streets and Avenues under "323" and "Boulevard" Acts.

The following streets and avenues were under construction during the year, and have been wholly or partially completed at an expenditure of \$573,504.61 for both sewer and surface work:

Abbotsford street. Athelwold street. Audubon road. Bay State road. Belmore terrace. Belvidere street. Bernard street. . ' Bloomfield street. Blue Hill avenue. Boylston street. Brighton avenue. Burt street. Chamberlain street. Chamblet street. Clinton street. Columbia road. Columbus avenue. Commonwealth avenue. Elizabeth street. Ellet street. Fairmount street. Fenelon street. Fullerton street. Gaylord street. Geneva avenue.

Granby street. Greenbrier street. Harvard street. Huntington avenue. Ipswich street. Lauriat avenue. Leroy street. Malvern street. Morse street. Norway street. Oakley street. Parker street. Peterborough street. Queensberry street. Ruggles street. Rosseter street. Sherborn street. St. Alphonsus street. St. Stephen street. Tonawanda street. Turner street. Vancouver street. Waterlow street. Wilder street. Wolcott street.

The was 18% -1898 was one of great activity in all the lines of barret Transment work. In addition to the construction of many new streets and the reconstruction of an unusual number of old ones, another section of Columbus avenue, from Ritchie street to Washington street, was completed, a considerable amount of work was done on Commonwealth avenue, and a beginning made on the great new boulevard, known as Columbia road, which was planned, laid out, and the order of construction passed, during the current year. The present condition of the new avenues is shown by the accompanying chart. Brighton and Huntington avenues are completed; Commonwealth avenue is built to Warren street, the remainder being still under construction; Blue Hill avenue is completed to Walk Hill street, and the remaining section to Mattapan square will be ordered as soon as the question of the grade crossing of the New England railroad is settled, that now being before the Railroad Commissioners; Columbus avenue will be completed early in the coming year, the only section not built being that between Roxbury crossing and Ritchie street; the new boulevard, Columbia road, will be under construction for the two years to come, but the sections between Blue Hill avenue and Edward Everett square are already fairly under way.

The construction of Columbia road completes the system of boulevards which was commenced with the laying out of Commonwealth avenue in the year 1895. The map herewith shown gives the location of these great avenues, and the complete system of drives and beautiful residential territories, which have been developed, can be seen at a glance. Starting from the city proper, it will be possible to reach almost any of the outlying sections over well-constructed, wide avenues. Columbia road, the latest to be laid out, will perhaps be the most beautiful drive in the city, reaching as it does from Blue Hill avenue to Marine Park, City Point, one roadway being designed as a park road, the other as a traffic road, and the centre space reserved for the electric A portion of this road will follow the shores of Dorchester bay, and the proposed plan will develop one of the most beautiful drives in any city, and convert what is now practically worthless territory into a valuable residential district.

The plan of treating hill streets, the grade of which is so steep as to make them impassable, which was followed in the case of Quincy street, Charlestown, and Ruth street, East Boston, was adopted for Covington street, South Boston, illustrations of which are inserted here. This form of construction seems to be well adapted to streets of this kind.

PAVING DIVISION.

Expenditure.

Maintenance. \$690,187.34 Specials. \$1,035,695.25

For expenditures under Laying Out and Construction of Highways, Blue Hill and other avenues, and South Union Station, see pages 2 and 3.

This division has charge of the maintenance and reconstruction of about four hundred and seventy-one (471) miles

of streets.

The following shows the amount and kind of reconstruction work done by the Paving Division during the year:

					Sq. Yds.
Granite blocks on concrete base,	with	pitch	-joints	5 .	21,759
Granite blocks on gravel base			•		191,578
Asphalt					23,215
Macadam. See note.					

NOTE.—A very large portion of the work of the Paving Division is the reconstruction of macadam streets. The amount of this work is best shown by the number of feet of edgestone set up and gutters relaid, which are as follows:

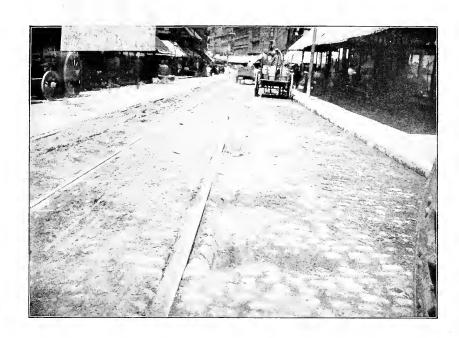

Edgestone set and reset, 243,367 linear feet. Gutters laid and relaid,

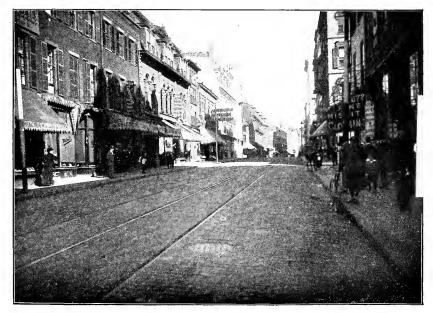

70,273 square yards.

The quantity of cracked stone and telford furnished from the city ledges was as follows:

CRACKED STONE, BALLAST OR TELFORD. Output of Stone from City Crushers.

	Crushed Stone.	Telford. Tons.
Bleiler's ledge	26,636	363
Centre-street crusher	20,052	
Chestnut Hill-avenue crusher	18,869	
Codman-street ledge	18,498	721
Commonwealth-avenue ledge	2,547	
Dimock-street crusher	37,265	
Kenney-street ledge	2,988	
Rosseter-street ledge	22,717	3,902
Totals	149,572	4,977

WASHINGTON STREET, SHOWING OLD AND NEW PAVEMENT.

The plan of repairing macadam streets with the steam roller by first picking, then lightly coating with stone and rolling in, was continued with success, and the coming season even more of the work will be done in this way, results showing that, at a small expense, macadam roads can be kept in excellent condition if given frequent care and attention. The difficulty at the present time, as it has been in the past, is that the maintenance appropriation is not sufficient to fully and systematically do this work. From the Paving Division maintenance appropriation, aside from the street work, must be taken sums sufficient for the removal of snow, cleaning of streets in the outlying districts, the placing of all signs, the maintenance of the Permit Office, the support of the stables and yards, rebates for stone and brick sidewalks, expense of numbering buildings, and the administration expenses of the Paving Division Office; thus the amount remaining for street repairs is inconsiderable, compared to the amount of work to be done.

The down-town section of the city has received but little attention in the last twenty years. A few main thoroughfares have been substantially repaved; but the great proportion of the streets are paved with the old small blocks on gravel base, and, through the placing underground of wires and other structures, have lost their shape, and are in such condition that constant attention from the force of patch-pavers is necessary.

More strongly then ever should be urged the making available of a sufficient appropriation to reconstruct the streets in the city proper. Boston in the past few years has expended freely in a most progressive way. The system of parks and of boulevards has been developed, and in this regard no city in the country can surpass what has already been accomplished and made possible to be done in the future. It is, however, a matter capable of demonstration that the amount of loss to the teaming interests annually caused by the rough and uneven pavements, to say nothing of the unsight-liness and discomfort to the great mass of citizens, reduced to dollars would equal an immense sum of money.

Another aspect of this question is that owners of valuable and high-taxed property in the city proper certainly have the right to ask that the street surfaces in front of their premises shall be well shaped, well drained, and well cleaned. From every point of view the city would be the great gainer by doing the work necessary in the down-town section in a short period of time, rather than continuing the present system of doing a bit here and a bit there, and constantly repairing and

patching; and for this purpose, as has been done by cities in other States, an act should be passed by the Legislature allowing the city of Boston to reconstruct the down-town streets by an appropriation made outside the debt limit, and \$500,000 a year should be allowed for the term, say, of three years.

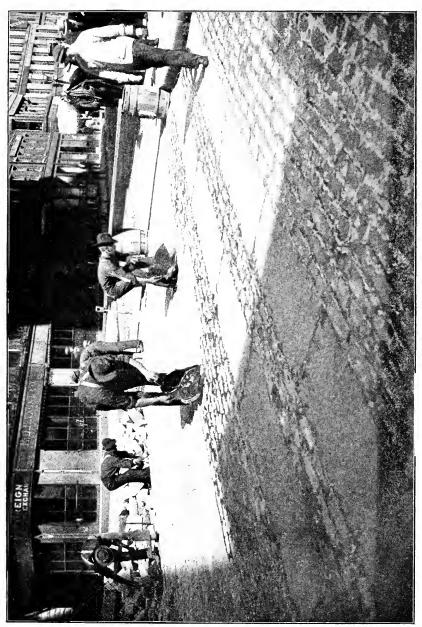

It must certainly be the wish of the citizens of Boston, that the streets of the city should be well paved and clean.

The press of this city might do a good work, when contrasting New York and Boston street conditions, if they would at the same time point out the causes of difference, namely, that New York has for the past three or four years expended several millions of dollars in substantially resurfacing and rebuilding—largely with asphalt—all the city streets.

It has been the custom for some years past for the City Council to appropriate each year a sum of money for street This money, with the exception of three or reconstruction. four assignments for special work, has been allotted by wards in equal sums, twenty-five wards receiving \$25,000 each without regard to the necessities of the different localities, and the work has been done by the street department under this limita-This practice is very objectionable, for the reason that every year certain work must be done in some wards which exceeds the amount of \$25,000. This is particularly true in the down-town section where every year a certain amount of block paying and asphalting should be done. I would recommend as a matter of department economy and for the general good of the city that the coming loan bill be passed as one appropriation, and the distribution and expenditure of the money be placed in the hands of the Superintendent of Streets. Under this arrangement, the most necessary work in all sections of the city could be done, no wards would suffer, and the present unsatisfactory conditions in certain localities might be removed.

Asphalt pavement is well adapted for the street surfacing of a large portion of this city, now macadamized or granitepaved, and the department is in receipt of many requests from individuals and from the City Council for this pavement.

The total amount of sheet asphalt pavement in Boston is 191,682 square yards, or 10.81 miles in length. It is distributed over 108 streets and parts of streets, the largest continuous stretches being on Columbus avenue and Huntington avenue. Of the total amount 112,216 square yards have been laid within five years, and are still under a maintenance guarantee from the contractors. The remainder, 79,466 square yards in area, is maintained in the manner of all other

city pared to the past year, the area maintained by the city was comparatively small; but in 1896 the guarantee expired on 32,050 square yards, and in 1897, on 30,118 square yards, and in 1898, 10,145 square yards more will come under the direct care of the city.

The street-cleaning work now done by the Paving Division, I believe should be transferred to the care of the Street-Cleaning Division, except that done in the semi-annual cleaning of the streets in the spring and fall, when both divisions work together. This matter I will touch on under the general

subject of street cleaning.

While the relations of this department with the railroad and other corporations occupying the streets have in most cases been pleasant, and without friction, the companies generally evidencing a desire to do their work properly, at the same time, with the best intentions on the part of the companies and the most careful supervision that can be given by this department, there must be a certain deterioration in the street surfaces caused by their work; and I believe that it would be but fair and proper that some system be adopted whereby this loss might be made good to the city by those companies occupying the streets. This might be done either in the form of a percentage tax on the receipts of the companies, or a fixed charge of so much for their trench openings, the price to be based upon the depth and width of trench and kind of pavement. The ordinance requiring a bond to be filed by each company guaranteeing its work for six months should be amended by extending the time to twelve months, as all the work done in the late summer, expires in the winter season. when it is impossible to make proper examination or to do proper work.

The most notable work done by this division the past year

was as follows, viz.:

Blue Hill avenue boulevard completed to Walk Hill street and Columbus avenue between West Walnut park and Ritchie street.

Columbia road sub-graded between Blue Hill avenue and the New England railroad.

These streets have been paved with large granite blocks

with pitch joints on concrete base, viz.:

Bulfinch street, Congress street between State street and Exchange street, North street between Merchants row and Union street, State street between Washington and Commercial streets, Washington street between Kneeland street and a point 200 feet south of Dover street, and Winthrop square.

These streets have been paved with large granite blocks

with pitch joints on a gravel base, viz.:

Charles street between Cambridge street and Leverett street, Washington street, 200 feet south of Dover to Waltham street, and Water street between Washington street and Devonshire street.

These streets have been paved with large granite blocks,

gravel joints on a gravel base, viz.:

Dudley street, between Brook avenue and Upham's corner, Main street, from Miller street across Mead street and Tremont street from Columbus avenue to Sarsfield street.

Work has been in progress on twenty-one streets under the

"323" Act, eight of which have been completed.

SEWER DIVISION.

Expenditures.

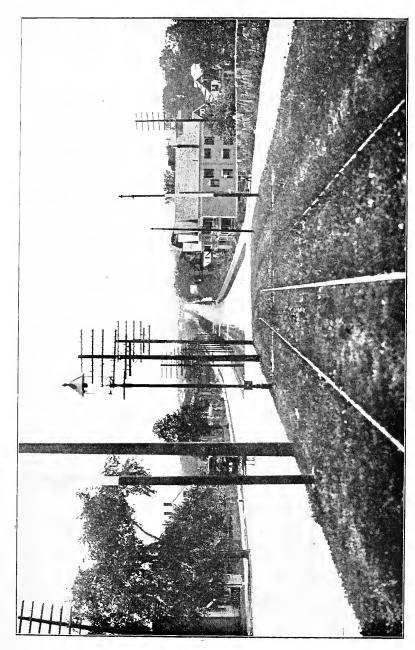

Maintenance. \$295,522.25

Construction. \$839,805.54

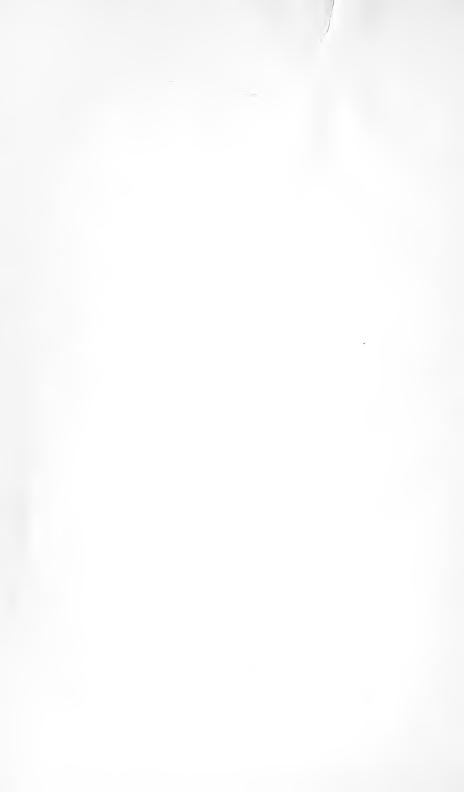

For expenditures under Laying Out and Construction of Highways, Blue Hill and other avenues, and South Union

Station, see pages 2 and 3.

The work and organization of the Sewer Division has very greatly increased during the past year, this being made possible by the passage of legislation (Chapter 426 of the Acts of 1897) giving the city of Boston the right to borrow annually \$1,000,000 for the construction of sewerage works, these works to be assessed on all estates benefited. The act also provided that a rental charge should be made for the use of sewers of a sum equal to the amount required for their maintenance and care. In former years it has been necessary for the City Council to pass in detail, appropriations for sewers, and as a result many great improvements which have been needed for years have been neglected owing to the difficulty of securing sufficient appropriations. Under the new act, this is done away with, and the most necessary work has been undertaken at once. The expenditures under the new act for construction for the first few years will be very considerable, but at the end of that time many of the large pieces of construction work will be accomplished, and the amount required will become less from year to year. The problem

BLUE HILL AVENUE BOULEVARD, SHOWING GREAT BLUE HILL IN THE DISTANCE.

of surfa express which has so long troubled the department, is also solved by this legislation, and the most important brook channels have been taken in hand, and the work already commenced. A general study of the sewerage system of the entire city is being made, and the development henceforth will be on established and scientific lines, instead of following what has been the custom in the past—to construct, not according to the needs, perhaps of the near future, but as allowed by the limitations of the appropriation.

A great amount of work which has been done in recent years for the necessary relief of certain territories has not been designed to meet or connect with the future developments of sewers, and in many cases this has brought up a very serious problem of rebuilding sewers of quite recent construction.

Already much has been accomplished which gives very great relief to certain sections where the sewers were badly over-crowded, and the overflows of insufficient size, or the condition so bad as to cause a back-up in time of rainfall. Under this new act, I believe it safe to predict that in a few years no city in the country will be better sewered than the city of Boston; and in no city will it be more easy for the citizen to secure new sewers where needed or relief from improper conditions.

Following is the full text of the new act, under which, as stated above, the work of the Sewer Division is now conducted:

[Chapter 426.]

AN ACT RELATIVE TO THE SEWERAGE WORKS OF THE CITY OF BOSTON.

Be it enacted, etc., as follows:

Section 1. The city council of the city of Boston shall annually appropriate, to be met by the issue of bonds as hereinafter provided, sums not exceeding one million dollars in any one year, for constructing sewerage works in said city, and shall also appropriate, to be met by the annual charges hereinafter provided for, such sums as the mayor of said city shall deem sufficient for maintaining and operating the sewerage works, and such sums as the city treasurer of said city shall each year determine to be the amount to be used for the sinking funds for bonds issued for sewerage works, which, with all other amounts so used and their accumulations, will pay all such bonds at maturity; and there shall also be used for said sinking funds all premiums received from the sale of said bonds, and all amounts received for breach of any contract for constructing sewerage works, or for securities deposited as security for making such contracts and declared to be forfeited to the city, or for sales of property. All sewers, drains, pumping stations and other works

for the collection or disposal of sewage, or surface or ground water in said city, shall be included in the term "sewerage work," as used in this act, and no such work shall hereafter be constructed in said city, except under authority of this act, unless the same has been

ordered to be constructed before the passage thereof.

SECT. 2. The board of street commissioners of said city from time to time, with the approval of the mayor, may order that sewers or drains be constructed in said city; that streams or water courses within the limits of said city be filled up or diverted from their original channels; that any such channel or any new channel be widened, deepened, paved or covered; that closed or open sewers or conduits be constructed for the drainage of lands, or that any part of any such stream or water course be so treated, or that any one or more of such things be done.

Sect. 3. Said board may take for said city by purchase or otherwise any lands in fee, and any rights or easements in lands, sewers, water courses and ways, which said board may deem necessary for sewerage works, and in order to take any such lands, water courses, rights or easements other than by purchase, said board, or a majority thereof, shall sign and cause to be recorded in the registry of deeds for the county of Suffolk, a statement that the same are taken for sewerage works, describing the same as certainly as is required in a common conveyance of land, and the lands, water courses, rights or easements so described shall upon such recording become the property of said city.

SECT. 4. The Superintendent of streets or such other officer as the mayor of said city shall from time to time direct shall carry out such order, and may at the expense of said city construct and maintain such work under or over any water course or private land, railroad or public way, in such manner as not to unnecessarily obstruct or impede public travel, and may alter or change the location or grade of any public way in which any such work is constructed, may alter or change the course of any water course, and in general may do any other act or thing deemed by him to be necessary in construct-

ing or maintaining such work.

SECT. 5. Said city shall pay all damages sustained by the owner of any land, water course, right or easement taken by said board, or injured in any manner, or by any person, in doing any act or thing under section four of this act, the same to be agreed upon by said board with the approval of the mayor and said owner, and if they cannot agree the damages shall, on the petition of said owner or mayor, be determined by a jury of the superior court for the county of Middlesex in the mauner provided by law with respect to lands taken for highways in said city of Boston, and costs shall be taxed and execution issued in favor of the prevailing party, as in civil cases. Any person whose water rights are thus taken or injured may apply as aforesaid within three years from the time of such taking or injury, and not afterwards.

SECT. 6. The treasurer of said city, to meet the expenses incurred in constructing any sewerage works heretofore or hereafter ordered to be constructed in said city, shall from time to time on the request of said board, approved by the mayor, issue to the total amount appropriated, but not exceeding one million dollars in any one year, bonds of said city, registered or coupon, as said treasurer shall from time to time determine, and the same shall not be considered in determining the limit of indebtedness of said city; said bonds shall

hereof the words Sewerage Loan, shall be countersigned by the mayor and be made payable in terms of thirty years from their date; and shall bear such rates of interest not exceeding four per cent. per annum, payable semi-annually on the first day of January and the first day of July of each year, and be issued and disposed of in such amounts, in such modes, and at such times and prices, as said treasurer with the approval of the mayor shall from time to time determine.

SECT. 7. The board of street commissioners, with the approval of the mayor, shall annually before the first day of July determine just and equitable sewerage charges to be paid by estates in said city for the construction, maintenance and operation of the sewerage works, taking into consideration in determining the charges the necessity of the works as caused by each estate, the amount of use thereof, if any, by the estate or its occupants, the benefit received therefrom by the estate, the amount of any assessment for a sewer paid by any owner of the estate, the length of time which has elapsed since such payment, and the use, if any, that has heretofore been made of the sewerage works by the occupants of the estate, and such other matters as they shall deem just and proper. The determination of such charges as aforesaid shall be final in all cases, and the amount thereof as determined for each estate shall be a lien thereon until paid, and said board shall notify the board of assessors of said city of the amount thereof forthwith after it has been determined, and the same shall be included in the next tax bill on the estate transmitted by said board to the collector, or in a tax bill therefor if no other tax bill is issued for such estate, and be collected as a part of the taxes on the estate.

SECT. 8. All sewers and connections ordered to be made in constructing any way under the authority of chapter three bundred and twenty-three of the acts of the year eighteen hundred and ninetyone, and of acts in amendment thereof or in addition thereto, shall be deemed to be constructed under the authority of this act, and the expenses therefor shall not be considered in determining the assessable cost of work, to be assessed under the authority of said acts.

Sect. 9. No person shall destroy or injure any sewerage work of said city, or without lawful authority therefor pollute or place or maintain any obstruction in any natural watercourse therein; and whoever violates any provision of this section shall for each offence be punished by a fine not exceeding one thousand dollars or by imprisonment in the house of correction not exceeding six months, or by both such fine and imprisonment.

SECT. 10. The supreme judicial court and any justice thereof, and the superior court and any justice thereof, shall have jurisdiction in equity, on the complaint of said city by its attorney, to enforce the provisions of this act and to prevent any violation thereof.

[Approved May 22, 1897.

STONY BROOK.

The work of connecting the Commissioners' channel at the inlet chamber, near Pynchon street, with the portion of the same channel built by the New York, New Haven and Hartford Railroad Company, has been completed this year, so that the Commissioners' channel is now built continuously from the

Back Bay Fens to Boylston station, with the exception of a small section near the site of the inlet chamber which is still open and uncompleted, pending the settlement of the claims of the Boston Belting Company. When the terms of this settlement are made, this piece will be completed either by building a channel of uniform size through the inlet chamber, or by putting in some form of gates or weir at this point.

During the coming year surveys are to be made to determine the line of the extension of this covered channel to the Hyde Park line. If possible a shorter and straighter line lying, mostly in the public streets, will be selected.

Next winter the city should petition the Legislature for permission to make a loan outside the debt limit, for the purpose of extending this channel as far as Forest Hills. The channel will be built as a covered conduit, as it lies through a thickly settled part of the city where an open channel is very objectionable.

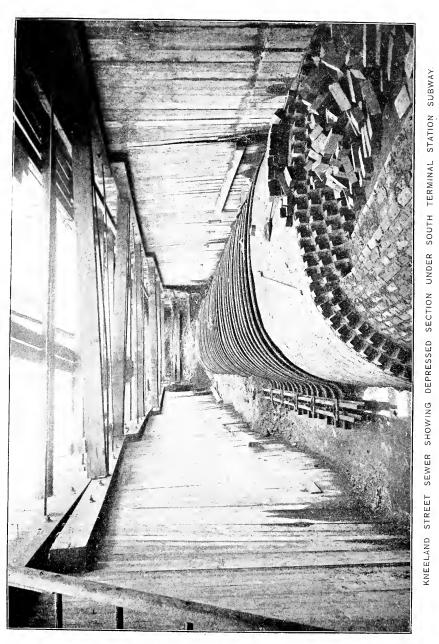

SURFACE DRAINAGE.

Under the provisions of the Sewerage Act, chapter 426, of the Acts of 1897, takings are to be made of all the brooks and natural water-courses of the city, and during the coming year extensive improvements will be carried out. Work has already been started upon Tenean brook which, when completed, will relieve the Lonsdale and Templeton streets district, the Geneva-avenue district and the district around the so-called "Clay Pits," and will also relieve the over-crowded sewer in the vicinity of Gibson and Park streets, where at present, in time of heavy rainfall, the manhole covers are forced some feet into the air, and the streets and fields flooded.

CANAL-STREET SYSTEM.

A very important and necessary piece of work, commenced last year, with a partial appropriation made by the City Government under the law then in force, was the construction of the Canal-street relief sewer. This was carried last year from the interceptor on Atlantic avenue through Central street, India street and a portion of Commercial street. This will be continued the coming year, and probably completed to the connection of the Canal-street sewer, near Causeway street.

The route of this sewer, was originally projected through Clinton and Blackstone streets and Haymarket square.

On account of the fact that if the Boston Transit Commission should determine to build a subway in Hanover street, the grade of this subway would be so low that it would be necessary to siphon the sewer; the route was changed to go from Clinton street, through Fulton and Cross streets, to Haymarket square, for the reason that, at the point where Cross street crosses Hanover street, the proposed grade of the subway is high enough to allow the sewer to be carried under it without siphoning.

Sewers have also been built in Atlantic avenue, by which the pollution has been removed from the Mercantile wharf and adjacent docks, and in Charles and Allen streets, relieving the condition of the sewer system in Brighton and Allen streets, and also in South Market street and many other

small streets.

The Boston Transit Commission, in connection with other work, has rebuilt sewers in Adams square, Beacon and School streets, Cornhill, Hanover street, Tremont street and Tremont row, and Washington street.

The building of the South Union station has resulted in a general remodelling of the sewer system in that part of the city. The sewers in Beach, East, Essex and Summer streets have been combined and carried out, and a new outlet sewer built in Summer-street extension.

About 700 feet of the interceptor in Cove street has been rebuilt and carried out around the head-house of the station, and a very large sewer built from Cove street, across the railroad land, a short distance north of Mt. Washington avenue, which is designed to take the sewage of Kneeland and Harvard streets district. On account of the low grade at which the railroad subway is designed across Mt. Washington avenue, this sewer had to be very much depressed, the crown of the sewer being at Grade 3; and as there was not sufficient weight of material over the sewer to resist tidal pressure, a particular form of construction was adopted, the arch of the sewer being held down by bent rails, and carried over the sewer, and bolted down on each side of the sewer to the pile caps underneath, as shown in accompanying cut.

The most important work which is contemplated for the coming year in the city proper is the completion of the Terminal sewers above mentioned, and continuing the large sewer under the railroad yard up Kneeland and South streets, from the interceptor to Harvard-street sewer, and the com-

pletion of the Canal-street sewer.

A district regulator will also be built on the interceptor, near Summer street, and a regulator in Kneeland street, near Cove street, connecting with the interceptor by a small brick sewer in Kneeland street. At the request of the Terminal Company, a portion of the intercepting sewer, near the location of the gas-holders at Federal-street bridge, will be rebuilt at its expense, in order to enable the city to abandon the portion of the existing interceptor which crosses under the proposed location of the Terminal Company's subway at this point. The house sewer will be built in the new Dorchester avenue, between Summer street and Mt. Washington avenue. The North Market-street sewer needs to be rebuilt; also, sewers in India, Milk and adjoining streets, which are in bad condition.

In Commercial street, near Clark street, the sewer system is excessively old and leaky, and must be remodelled, and probably entirely rebuilt, as the tide rises and falls freely in these sewers at the present time.

In Charlestown and East Boston, the work on the connections of the North Metropolitan sewer will be continued and completed the following year. This will mean for these localities a great relief from the former unpleasant and

unhealthy disposition of the sewage on the flats.

A large amount of sewer work is required in West Roxbury, and the coming year will be an active one in that locality. Owing to the completion of the Neponset Valley Metropolitan sewer through this territory, many sewers can now be built which before were not possible; and large areas, which for a long time have been partially developed, can now be made available for residence.

The abolition of grade crossings at Roslindale and Springstreet stations will necessitate some changes in the surface drainage at these points, and will allow the proper development of the sewer system for the Hewlett-street district, which has been held back on account of these proposed changes.

A very unusual amount of sewer work has been completed in Dorchester the past year; and, in addition to the great number of small sewers, might be mentioned the Rosemont and Mill-streets main sewer, which will be carried on in connection with the building of the covered channel for the

southern branch of Tenean brook.

The completion of the Columbia-road boulevard will require a large amount of sewer work to be done in that section the coming season, which has already been commenced. A new sewer system will also be constructed for the northern half of Savin Hill, including the portion of Savin Hill avenue between the railroad and Grampian way.

In addition to the considerable amount of ordinary sewer work in South Boston, there has been completed the past year the B and Seventh-streets overflow, and also the sewer in Dorchester avenue between B and D streets. Included in the work remaining to be done in this section are the

B-street and Kemp-street outlets.

About 2,100 feet of the West Roxbury low level sewer has been completed this year. The building of the sewer system in Columbus avenue, between Roxbury crossing and Dimock street, is in progress. The relief sewer for the Notre Dame-street district is well under way, and will be completed in another year. This will relieve this section, which has suffered for many years from floods and surface water. The Dorchester-brook sewer has been extended from Norfolk avenue to Clifton street. The long-needed rebuilding of Harrison-avenue main sewer has been nearly completed this year, and this will enable the city to correct the sewer system of the adjacent territory. A considerable amount of new work has been done in the new territory south of Massachusetts avenue, and adjoining the park. There is still under consideration the building of house sewers to relieve from sewage the old Stony-brook channel between Huntington avenue and Elmwood street. This old channel should be rebuilt, and a general system of sewerage for that district introduced. As this involves a very large expenditure, the matter has been held in abeyance until other more important work is accomplished. This matter will be given careful study the coming year.

Muddy-river conduit in Brookline avenue should also be repaired, and a considerable portion of it rebuilt. This also

is a very extensive work.

A considerable amount of work has been accomplished in Brighton. The coming year a large number of petitions for house sewers will receive attention, and the matter of surface

drainage of this territory will be taken in hand.

There has been considerable complaint from residents in the neighborhood of the Back Bay Fens regarding sewage deposits. It is claimed, and justly so, that the Stony brook water is contaminated with sewage, and that the settlement of the past twelve years, since the Fens were constructed, has resulted in a very large amount of objectionable deposits. There is but one way to overcome this difficulty, and that is to extend the Stony brook channel to Charlés river. This would cost a very considerable amount of money, and the first portion to be undertaken would be the reconstruction of about 4,500 feet of the old Stony brook

channel, at an estimated cost of about \$250,000. Ultimately the new channels of Stony brook should be extended to the Charles river.

It is important that the Fens should be cleaned, and the existing deposits of sewage removed. I would recommend that an appropriation be made for this purpose, and this would undoubtedly for some time to come remove any serious objections. It is estimated that this would require the sum of \$25,000.

In the last annual report a brief account was given of the controversy between the Metropolitan Sewerage Commission and the city of Boston, and the matter was followed up during the past year. Finally, an agreement was arrived at, and a contract drawn for five years, from 1896 to 1900, inclusive, by which, the amount the Metropolitan Sewerage Commission will pay the city of Boston for the rental of its sewer system is defined. As a matter of record, a copy of this contract will be found in the Sewer Appendix, page 251.

Upon the execution of this agreement, the department proceeded with the work of enlarging the sewage storage reservoirs at Moon Island, a contract was let, and work has been begun. The result of this construction will be the doubling of the capacity of the reservoirs, and it is expected that they will prove sufficient for all requirements likely to be made until the year 1905. If at this time the volume of sewage becomes so great as to overtax the reservoirs, further extensions will have to be made, for which there is ample room on the island.

At the same time, the pumping plant at the Calf Pasture has been thoroughly everhauled, and its capacity increased. A contract has been made for designing a new 72,000,000-gallon sewage-pump, which is to be set upon a foundation built for that purpose when the original plant was put in. The design for this pump will be completed during the coming year, and a contract let for its construction, it is expected,

during the succeeding year.

SANITARY DIVISION.

Expenditures. \$492,670.56

The past year the collections of this division were as follows: 353,725 loads, 54 cubic feet each, of house dirt and

ashes; 56,783 loads of house offal, showing a very considerable increase in the amount of material removed.

No special money being provided for this division, it has been necessary to use the maintenance appropriation for the purchase of certain supplies which were not estimated when the appropriation was made; and, in the interest of safety, it was necessary to expend a considerable sum on the Fort Hill wharf.

The dumping scows also have required a considerable ex-

penditure in docking and repairs.

A contract has been made with the New England Sanitary Product Company to receive the offal at various dumping points, and remove the same to a plant to be constructed by them at the Cow Pasture. This will do away with the very objectionable practice of dumping this material at sea. The contract and plans require that a plant shall be erected by the contracting company, substantial in every way, and thoroughly adapted to the purposes for which it is to be used, and it is expected that on completion the most perfect plant of its kind in this country will be in operation.

Before the end of another financial year, it is my hope to also report a plant in operation for the disposal of the combustible waste. This matter has received careful attention, but it has not been possible as yet to bring about the improvement. I feel confident, however, that the coming year this matter will be taken care of. It will then be only necessary for the city to dispose of its solid ash collection, and, as this is clean material, there is no objection to either dumping at sea or depositing on vacant land. The entire matter of the disposition of the waste products of the city will then be handled in a proper and sanitary manner.

As the garbarge must now be handled for final disposition, separately from the ashes, it will be necessary to reconstruct Fort Hill wharf, so as to allow two scows to dock at

the same time, there now being but one berth.

The steel carts put in service last year have proved satisfactory, and I would recommend the gradual displacement of the old form of wooden cart by new steel dumping carts.

STREET CLEANING DIVISION.

Expenditure. \$309,993.38

Cleaned 13,261 miles of streets; removed 121,768 loads of dirt.

The work of this division has been carried on substantially on the old lines, with the exception of such slight extension of the patrol service as the appropriation would allow. The work of this division is greatly increased, and the results made less satisfactory, from the fact that so large a portion of the down-town streets are old and in poor condition. On streets newly constructed with modern paving—either asphalt or granite blocks with pitch joints—it is a comparatively easy task to keep the pavements clean; and on all such streets the patrol system is largely used, and as a result these streets are always clean and show up handsomely. There is, however, but a very small proportion of the downtown area that has been repaved for many years.

It is desirable that street-cleaning districts be established in the sections of the city which are now covered in this work by the Paving Division. Under the present plan, as a matter of economy, it has been the practice for the Paving Division to do the street cleaning in the sections where, at the time of this arrangement, there was little or no paving; and also in East Boston. I would recommend that a street-cleaning force be established in East Boston, Dorchester and Brighton. No stable accommodations being available, and the appropriation not being of sufficient size to warrant, this plan has not been carried out. The street-cleaning forces, however, have been sent for the first time, as often as arrangements could be made, to Brighton and Dorchester. East Boston is cared

By the purchase of wharf property in East Boston in 1897, it is now possible, if an appropriation can be obtained, to make suitable quarters for the establishment of both Street-Cleaning and Sanitary Districts in that section of the city. In Dorchester, there is available for this purpose the buildings on Gibson street, excellently located, and to be secured

for by the men of the Charlestown District.

A special appropriation should be made for the removal of snow; it would then be possible to estimate with some accuracy the amount required for doing the work of the year on a certain basis.

at a low cost.

A more rigid enforcement of the ordinances in relation to the throwing of waste materials into the streets would greatly assist the department in setting a higher standard of cleanliness.

BRIDGE DIVISION.

Maintenance.
Expenditure.
\$126,529.32

Special.
Expenditure.
\$39,265.96

The City Council has greatly neglected this division in the matter of appropriations. Until within the past two years an appropriation has been made for the reconstruction of certain old bridges which were badly out of repair, and the maintenance appropriation has never been considered to be made for the purpose of doing new work. The care of the 128 bridges and the payment of draw-tenders and other employees and necessary repair stock and supplies is all that is contemplated when the maintenance appropriation is made.

No special money was voted last year, and only by great effort was a small amount transferred, which made possible some slight reconstruction work on Congress-street bridge, whereby it was made safe. Several of the most important bridges of the city, where the travel is greatly increased are in such a condition that immediate action should be taken. Substantially new bridges are required at Congress street, Mount Washington avenue and Malden, and other bridges are in need of considerable reconstruction.

FERRY DIVISION.

Maintenance. Expenditure. \$219,983.24

Specials.
Expenditure.
\$5,862.88
Receipts.
\$171,449.21

For expenditure under the New Ferry Landing see page 3.

During the past year addition has been made to the electric motors for assisting teams up the drops. These have worked well, and have made possible a better running time of the boats. Three boats have been equipped with electric lights, now making five boats so provided. Contract has been let for the building of a new ferry-boat, the completion of which is called for by May 1, 1898. Another boat will be immediately contracted for as soon as this one is in service, and found to be satisfactory.

One new drop and tank have been constructed and put in place at the South Ferry, East Boston side, and the City Engineer recommends that two more be built and placed in position. When this is done, all the drops will be practically new. Plans and specifications have been prepared for a new head-house and the re-arrangement of slips at the South Ferry, East Boston side. There is some question as to the land-takings, which may delay the prosecution of this work.

The "East Boston" and "Hugh O'Brien" have been hauled on the railway, calked and metaled during the past year. The boats are now in good condition with the exception of the old "Winthrop," which cannot possibly be made to do service more than one or two more years.

STREET WATERING DIVISION.

Expenditure. \$78,736.72

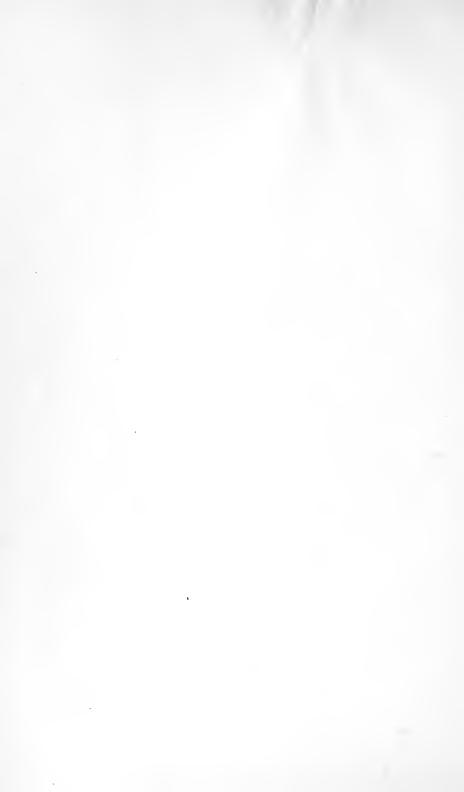

Not including water-bills of \$76,930.40

The season of 1897 was a very difficult one, unusal weather prevailing until late in the fall, making it necessary to extend the street watering season. The increase in expenditure over last year of about \$7,500 was made necessary

by this lengthening of the season.

To properly cover the work of street watering, a larger appropriation should be made available; and I would recommend that for the coming year the watering of all the city streets be placed under the supervision of this department, and advantage be taken of the Act passed by the Legislature of 1897, authorizing this work to be done and the cost assessed on the owners of the abutting estates. At the present time the city undertakes the care of macadam streets only, and the watering of paved streets is done by subscrip-

FERRY-BOAT "GOV. RUSSELL," SHOWING CONSTRUCTION.

tion to private contractors; thus the burden bears unfairly, and the results are not satisfactory. In certain sections of the city, particularly in the poorer quarter, where the streets are paved, no watering is done for the reason that the people are not able to pay, or their great numbers make it difficult for arrangements to be made for the work by individual efforts.

Under the Assessment Act the cost of street watering would be assessed on the property, and the amount would be so small that it could hardly be felt as a hardship. Studies are being made along this line, and it is probable that the City Council will be asked to authorize the department to undertake the street watering under the Assessment Act.

As mentioned in my last report, it was expected that a thorough trial would be given the electric watering car service. The matter, however, was blocked by the management of the West End Street Railway Company, and the experiment still remains untried. Under present conditions, however, I anticipate no trouble of this sort the coming season, and the subject will be thoroughly gone into.

PURCHASE OF SUPPLIES.

The same careful attention has been given through the purchasing agent to the purchase of supplies for the department. The establishment of a Central Supply Department and stock-room has made it possible to take advantage of the market, and the matter of distribution and checking of supplies has been given more attention, with good results.

STABLES AND BUILDINGS.

The condition of the buildings occupied by the Street Department for stables and other purposes is such that a very considerable amount of money could be expended to advantage, and with an ultimate saving to the city. As far as the maintenance appropriation would allow, repairs, painting and additions have been made; but these have necessarily been quite limited. In the west yard, on North Grove street, there is ample room for the care of a much larger force. The buildings at this yard are, with one exception, old, badly arranged, and so situated as to cover the ground with the least economy of space. Could an appropriation be made, it would be possible to re-arrange this yard, so that all the horses and teams required for service in that district, by the Street-Cleaning, Sanitary and Sewer Divisions, could be provided for. What is true of this yard applies to many others.

In West Roxbury, the Paving Division stable is in such condition that it is hardly worth while to repair; and yet, in its present shape, it is almost untenantable.

A hospital for sick horses is greatly needed. I trust the comparatively small amount of money needed for this pur-

pose will be made available next year.

An additional number of at least fifty horses could be employed with economy and advantage to the general work of the department. Stable accommodations, however, are such that it is necessary to depend on hired teams.

SMOKE NUISANCE.

Under the provision of the statute relative to the abatement of the smoke nuisance in the city of Boston, this work has been authoritatively assigned by the Mayor to this department for some years. This includes careful inspection of all boiler plants and the examination of all plants in the matter of smoke nuisance. No boiler permits are granted by the Building Commissioner without first receiving the approval of this department; and before this department consent to these permits, the applicant must make satisfactory representation as to the proper equipment of the plant, so that no smoke nuisance will arise.

Although it is a somewhat difficult matter to handle, the results of the work of this department in this city have been quite satisfactory. One inspector and two assistants devote their entire time to this subject.

Complaints.

Much attention has been given by the present administration to the treatment of complaints and requests received at this office, and a system has been developed during the past year which it is believed is producing excellent results. In past years there appears to have been no uniform method of dealing with complaints, each having been treated as an individual case. In some cases a memorandum was sent to the proper official, in others a formal letter, and sometimes the original complaint. In any case there was no regular system of obtaining reports or recording the results of such investigation as was made, and no assurance was given to the Superintendent that the causes of dissatisfaction were removed or explained.

Under the present system, on receipt of a complaint, it is immediately stamped with a number (these numbers being consecutive), a reference to the proper official of the depart-

ment, and brief ment of what action or information is desired. Then made on a day book kept for the purpose, giving the name of the complainant, number of complaint, official to whom referred, and memorandum of the subject and of the directions given by this office. Thus, in a very few minutes from the time of its receipt, the document is on its way to the proper official to receive such attention

as may be required.

Each complaint so forwarded is required to be returned to the Central Office, with a report stating what action has been taken, and giving such information as is necessary to a full understanding of the case. To avoid any risk of complaints being overlooked in the several divisions of the department, each complaint on being returned is checked off in the day book, and each week a list, by numbers, is sent to the different divisions of any complaints forwarded during the preceding week and not yet returned. Upon the receipt of such notice the official in charge is required either to return the documents with explanation of the delay, or to report what progress has been made, and what further action is proposed.

Upon receipt of any complaint, suitable acknowledgment is made to the writer. If the cause of complaint is such that there must necessarily be some delay, or if there are any special circumstances to be explained, a letter is written; but if the matter relates to some fault in the service or to some minor defect in a street or in some of the structures under the care of the department, a printed form on a double postal card is filled in and sent. This consists of a statement (signed by the Superintendent), that the communication has been received and referred to the proper division for action or report, with the number and date of the complaint. The reply card attached is addressed to the Superintendent of Streets, and contains a printed acknowledgment that the matter has been satisfactorily attended to, with number and subject of complaint and date of receipt, and blanks for date of reply and signature of complainant.

At the bottom of this reply card is left a space for any comment which the writer may desire to make, and this can be used, if desired, for forwarding a second complaint if the former one has not been attended to in a satisfactory manner. When a reply card containing such further complaint is received, it is compared with the report (if already on file), and forwarded to the same division to which the original complaint was sent, and a record made on the day book. The number on the card and on the original complaint being the same, it is very easy to trace the responsibility for any

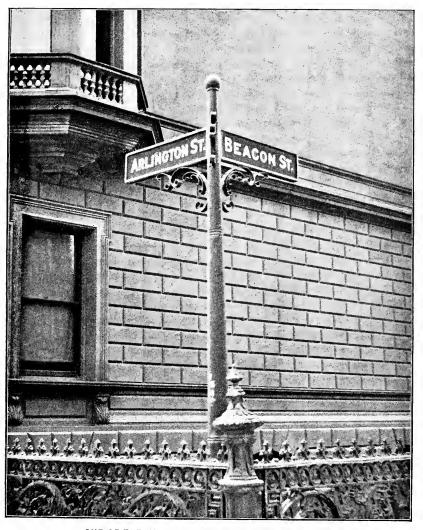

delay which may have occurred.

Of the acknowledgment cards sent out from this office, letterpress copies are taken, making practically as good a record in the letter books as though a letter had been written and sent, and at a great saving of time. It will be noted that by the use of these reply cards the acknowledgment of satisfactory service by the complainant only requires the insertion of the date, and the signature of the writer — the card, as already stated, being addressed, ready for mailing.

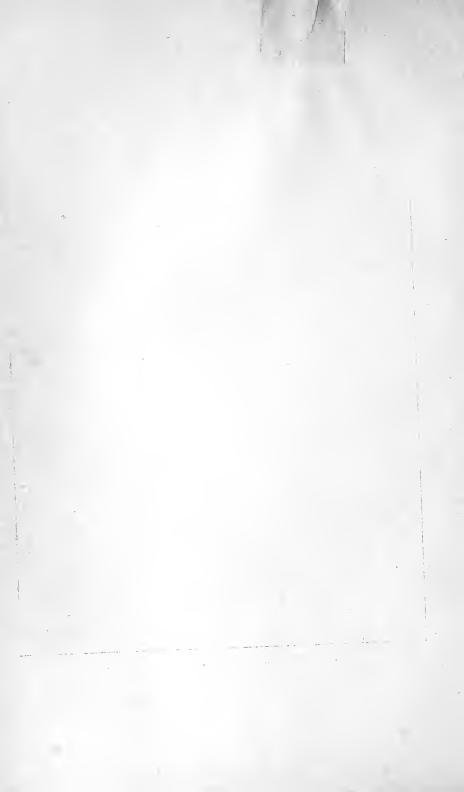

The daily record of complaints, in which the numbers appear consecutively, is indexed each day alphabetically under the names of the complainants. When the complaints are finally returned to this office, they are pasted in file books in the order of their numbers, the reply cards being attached to the complaints to which they relate, and fully indexed by giving the names of the writers and the subjects of complaint. It is thus easy to turn back to former complaints on any particular subject or from any particular correspondent.

By this system, it is believed that the essential conditions of good service are fulfilled, and at a comparatively small expenditure of time and labor. It insures the immediate transmission of the complaint to the executive officer in charge, and his prompt action and report; it gives the correspondent the assurance that his complaint is receiving attention, enables him with very little trouble to acknowledge satisfactory service, and gives him an opportunity to make further criticism if he desires; and finally, it brings all the facts in the case before the superintendent in such a manner that he can readily forward to the complainant an explanation of any circumstances in regard to which it is desirable that he should be informed.

It may not be out of place to say that the department not only admits the right of every citizen to make reasonable complaint, but fully recognizes the fact that intelligent and friendly criticism is a most valuable aid to good service, amounting as it does to a system of volunteer inspection, and supplementing the regular inspection service of the depart-The public has shown itself to be very willing to cooperate with the department in carrying out the details of this system. When the return postal cards were introduced, while it was believed that a large proportion would be returned, it was feared that many would be neglected or forgotten; but the result has exceeded expectation, the number not returned having proved a very small one. Moreover, the great majority of complainants, finding themselves met in

ONE OF THE IMPROVED STREET SIGNS, STYLE No. 11.

a spirit of fairnes with a desire to do what is possible for their relief, have seed to be reasonable in their demands, and anxious only for efficient service and the good of the public; and I wish to take this opportunity to express my gratitude to the many good citizens who have given the department their co-operation and support in its efforts to improve the service and adapt it to the needs of the community.

SIGNS.

Greater and more systematic attention has been given this year to the placing of street signs. New and more attractive styles of double-faced post signs have been devised and adopted. While this may seem a comparatively unimportant matter, the many favorable comments made by citizens to the department show that this improvement has been appreciated.

The signs placed by this department are made by the Sanitary Division, but the work of locating is under the supervision and direction of, and the expenditure charged to the

Paving Division.

BOSTON AND CAMBRIDGE BRIDGES.

No work of importance has been undertaken the past year on these bridges. The utmost care, however, has been necessary to keep them safe under the limited appropriation, and in good condition for the immense travel.

I must again express my appreciation of the services of my associate, Mr. William J. Marvin, of Cambridge, upon

whom the detail of the work has largely fallen.

The matter of a new bridge to Cambridge, as recommended in the last report of this department, is before the present Legislature, with an excellent prospect of legislation being passed which will make possible the construction of a new and adequate bridge.

Craigie Bridge.

A new sidewalk has been built on the south side of the bridge for the whole length of the Cambridge end, a new roadway has been laid for the same distance between the sidewalk and the track, one hundred and twenty-five feet of new sidewalk has been built on the north side at the Boston end, and new timbers were put under the draw to hold it in place. The work was done at night so as not to stop travel.

The pavement on the north side of the bridge for its whole length has been repaired, and the following repairs have been made on the draw-tender's house: New gutters on piazza, new tinning on ell, two chimneys re-topped, two coats of paint put on house. The engine-house and iron on pier, and the new fence have been painted, and two chimneys re-topped on the house at the Cambridge end of bridge.

The bridge is swept once a week, always after midnight, and the roadway is watered with salt water three times daily when necessary to lay the dust. The ordinary repairs, and sweeping sidewalks and piers have been done by the draw-

tender and assistants; draw sheathed when necessary.

Next year the sidewalk on the north side at the Cambridge end will have to be rebuilt, a new fence built, and the roadway paved. The sidewalk on the south side Boston end will have to be repaired and a new fence built. A part of the piles at the Cambridge end have been in place about one hundred years, and they have to be looked after very closely to prevent accidents.

Harvard Bridge.

Harvard bridge is in good condition. At the request of the riders of bicycles, for a width of three feet from the curbing on each side of the bridge, the sheathing which has just been completed, was laid lengthwise of the bridge, the balance being laid diagonally as heretofore. This flooring lasts about nine months, and then repairs have to be made. Last year about thirteen thousand feet of the best of the old sheathing was saved for patching, making quite a saving, and when sheathing the roadway this year about the same quantity was saved for use in a similar way next year.

The cost of sheathing the roadway was \$2,795, Boston

paying one-half.

The whole length of the iron fence on each side of the bridge has been painted. The iron work outside the rail has been scraped and painted, and the house on the draw pier

has been painted.

The West End Street Railway Company relaid their tracks on the bridge at the time the sheathing was done, putting in new rails where necessary. The sheathing between the rails and between the tracks was renewed with new plank, making a much better road than the old one. The West End Railway Company has always promptly responded to all requests for needed repairs or alterations.

Ordinary repairs on the bridge are made by the drawtender and his assistants. They also clean the surface of the bridge weekly, remove he snow from the sidewalk, and keep the electric light globes clean and in order.

Prison Point Bridge.

This bridge is in very bad condition. The draw, which is of the old-fashioned leaf pattern, is in such condition that it is almost impossible to raise it. It would require a considerable outlay to make it work easily, but we do not think it advisable to expend much money upon it, as it is expected that the Boston and Maine Railroad will begin the work of separating the grades of the road and railroad at this point next year and the plan for so doing provides for a new highway bridge over the channel.

The draw-tender's house has been painted outside, the two chimneys retopped, and the bridge and draw have been sheathed. Ordinary small repairs have been made and

sweeping done by the draw-tender and assistants.

West Boston Bridge.

This bridge is in the same condition as it was last year. By watching it closely and making the necessary repairs promptly it is kept in good condition for travel. It is a constant care. We hope the time is not far distant when the cities of Boston and Cambridge, with the co-operation of the projected elevated railroad company, will see their way clear to build a new bridge of stone and iron.

The paving has been repaired on both sides of the roadwav the entire length of the bridge. The roof of the enginehouse has been stripped of the shingles that were badly decayed and a tin roof substituted, making it much safer against taking fire from sparks which are freely showered upon it from the smoke stacks of tugs while lying there. The engine-house, sheds and iron work have been painted.

The bridge has been swept once a week, always after midnight, and watered three times daily with salt water in dusty Sweeping piers and draw, cleaning snow from draw piers and sidewalks, and ordinary repairs have been made by the draw-tender and his assistants. The draw has been sheathed when necessary.

The West End Street Railway Company relaid their tracks the whole length of the bridge, it being necessary to do so on account of the settling of the pavement, and the generally poor condition of the bridge.

(t)

IN GENERAL.

The usual statement is appended, showing the number of draw openings and the number of vessels which passed through, also the tables showing the traffic over bridges on September 29, 1897.

The amount of revenue received for rents, dockage, repairs to West End Street Railway Company's tracks, etc., during the year has been \$1,993.48 and one-half, \$996.74,

has been paid to each city.

The following is a statement of the payments made by the City of Boston, on account of the Canal, Harvard, Prison Point and West Boston bridges, from February 1, 1897, to January 31, 1898:

The following statement shows the work done by the various divisions:

SUMMARY OF WORK DONE.

BRIDGE DIVISION.

Overhauled and repaired the following bridges, viz.:

Beacon street (centre span), Blakemore street, Broadway, Chelsea bridge (North), Congress street, Essex street, Leyden street, Meridian street, Shawmut avenue, Warren and Western avenue.

A portion of Broadway bridge, 118 feet long by 30 feet wide, was entirely rebuilt.

Shawmut-avenue bridge was in poor condition, and the girders, cross-braces, roadway and iron-work were thoroughly overhauled, thus putting the bridge in good condition.

FERRY DIVISION.

The machinery and woodwork of six boats were thoroughly overhauled and painted, and two boats were thoroughly calked and metalled.

Four electric motors have been installed, thus equipping each landing with power to assist teams up the drops.

Three new boats have been equipped with electric lights,

making five in all thus equipped.

The south pier, North Ferry, East Boston side, has been thoroughly repaired, and the landing at the South Ferry, East Boston side, has been raised, thus preventing flooding at high tide.

PAVING DIVISION.

Paved and regulated 37 streets with granite blocks, 21,759 square yards on concrete base, and 191,578 square yards on gravel base, or a total of about 213,337 square yards.

70,273 square yards gutters paved, 66,859 linear feet new edgestone set, and 176,508 linear feet reset, making a total

of 243,367 linear feet set and reset.

Sidewalks laid and relaid as follows, viz.:

Brick, 89,900 square yards, new; and 47,065, old, relaid, or a total of 136,965 square yards.

Crushed stone, 35,247 square yards.

Artificial stone sidewalks, 127,389 square feet.

23,188 square yards asphalt have been laid on a concrete base.

Work has progressed on 21 streets laid out and ordered constructed under the "323" Act, and 13 of these streets have been finished.

SEWER DIVISION.

Built 30.5 miles of sewers, 412 new catch-basins, flushed 178 miles of sewers, removed 806 cubic yards of sewage deposit from sewers, and 1,008 cubic yards of sludge from pumping-station, and cleaned 6,655 catch-basins.

There are now about 475 miles of sewers maintained by

this division.

SANITARY DIVISION.

Collected and removed 353,725 loads, of 54 cubic feet each, of house dirt, and 56,783 loads of offal.

1

STREET-CLEANING DIVISION.

Cleaned 13,261 miles of streets, removed 121,768 loads of street sweepings, etc., and emptied §29,064 public waste barrels.

STREET-WATERING DIVISION.

Watered 347.86 miles of streets.

EMPLOYMENT OF LABOR.

The report of the Civil Service Clerk follows, showing the classification of the employees of the department and the transfers and requisitions made for the several divisions of

the Department.

During the year 118 applications were made upon the State Commission for 265 men of various grades and occupations; of this number 10 were for promotions and 18 were for the reinstatement of 37 men. 547 names were submitted, of which number 281 were selected and appointed, of whom 27 were chosen under the Veterans' Preference Act of 1896, and 34 provisional appointments were made under Civil Service Rule No. 36. Of the 10 applications made for promotions 9 were granted, 1 failing to pass the examination, and on the 18 requests for the reinstatement of 37 employees, 35 were granted and 2 rejected.

During the year 227 transfers were made, which the Commission approved, of which number 150 were from Transit, 27 from Water, 22 from Public Grounds, 16 from Park, 5 from Improved Sewerage, 3 from Mt. Hope Cemetery, 1

each from Health, Lamp and School Departments.

Notices of 128 discharges from the department rolls were

forwarded to the Commission.

The department records show that there are now 3,384 persons eligible for employment in the several divisions and of that number 3,089 were upon the January, 1898, pay-rolls.

Grade and Number of Employees.

PART II.

APPENDICES.

PAGES 1 TO 394.

APPENDIX A.

REPORT OF THE DEPUTY SUPERINTENDENT OF THE BRIDGE DIVISION.

927 AND 928 TREMONT BUILDING, BOSTON, February 1, 1898.

MR. BENJ. W. Wells, Superintendent of Streets.

DEAR SIR: I respectfully submit my annual report of the expenditures, income and operation of the Bridge Division of the Street Department for the financial year ending January 31, 1898.

There was appropriated for the care and maintenance of

this division, during the year, the sum of \$125,000.

The total number of bridges in Boston is 132. This number does not include culverts. Four (4) of these bridges, viz.: Harvard, Canal, Prison Point, and West Boston, all connecting with Cambridge, are under the care of two commissioners, one of whom is appointed by the city of Boston and the other by the city of Cambridge.

Thirty-three are wholly supported by railroad corporations, and ninety-nine are supported wholly or in part by the city

of Boston.

There are twenty-three tide-water bridges provided with draws; six (6) of these are operated by steam, four (4) by

electricity, and thirteen (13) by hand power.

Malden bridge, one of the principal bridges operated by hand power, is in immediate need of extensive repairs, as it is old and badly decayed, and requires constant care to keep it in order.

I would recommend also that steam or electric power be

substituted to operate the draw.

Mt. Washington-avenue bridge is also operated by hand power, and is second, on the south side, in the number of openings to permit vessels to pass through, and has a large amount of travel, heavy teaming, etc.

It is hoped that with the extensive improvements in the vicinity of this bridge, provision will be made for its recon-

struction.

There are twelve tide-wate great importance, operated as follows: Meridia elsea (North), Dover street, and Federal street 1 ower.

Chelsea (South), Warren, River, Congress street,

L street, and Broadway by stear. power.

Malden and Mt. Washington avenue by hand power.

During the past year four (4) new trucks have been placed on Warren bridge, new deck put in, sheathing, etc., all the ironwork painted, and the tracks levelled by placing oak sleepers two feet apart underneath. A new engine, with winches, for the purpose of assisting vessels to pass through the draw, thus saving much time to public travel, is being placed in position.

On May 21 a portion of Broadway pier, 118 feet long and 30 feet wide, fell into the water, carrying with it all cross beams and deck, and a large tool-house, necessitating the

rebuilding of a new pile structure.

The remainder of the pier is in great need of being rebuilt,

and should be attended to this year.

Congress-street bridge needed extensive repairs during the past year. The sidewalks on both sides have been reconstructed, the deck on road-bed, the bulkhead at the draw, and the fender-guards, etc., on the South Boston side, have been repaired.

Close attention should be given to the repairs of this bridge the coming year, owing to the immense increase of travel over the bridge, on account of the new freight facili-

ties located at South Boston.

The following-named bridges were closed to public travel for reconstruction and extensive repairs:

May 4, Western-avenue bridge, new timbers, new deck and

sheathing, new sidewalks and piling.

May 25. Leyden street, East Boston, ironwork scraped and painted, new deck and sheathing on road-bed, new sidewalks.

July 26. Blakemore street, new sidewalks.

August 10. Centre span on Beacon street, ironwork

cleaned and painted; new timbers, deck and sheathing.

September 16. Shawmut avenue stripped of all old woodwork; iron girders properly cleaned and painted; about thirty iron braces removed and replaced with new ones; new deck and sheathing.

November 3. Keyes street, new timbers, new deck sheath-

ing and new sidewalks.

November 9. Cornwall street, new timbers, deck sheathing and sidewalks.

November 29. Elmwood street being in such a bad condition new timbers for deck, sheathing and sidewalks were used.

December 23. Hyde Park avenue, new stone abutments; new timbers eight by sixteen inches, two feet apart on centre, new deck, sheathing and sidewalks, making a complete new bridge.

The inland bridges have been given a careful inspection and all efforts made to keep them in safe condition; they

have been thoroughly swept and kept free and clean.

Good discipline has been maintained among the drawtenders and their assistants on the different draw-bridges.

They have faithfully and efficiently performed their various duties, and no accidents have occurred through neglect of

duty.

The material used in repairs has been of good quality, has always been promptly delivered, thereby causing no delay or disappointment in the performance of work.

The same care has been exercised to keep on hand dupli-

cate sets of gearing.

This precaution will lessen public inconvenience in case of accidents.

I would call attention once more to the fact that more suitable headquarters be provided for the mechanical department in this division; would also recommend that the following-named bridges be provided with proper machinery to assist vessels through, and obviate largely the inconvenience to public travel. Chelsea (North), Dover street, Federal street, Mt. Washington avenue and Meridian street.

Table of expenditures on structural repairs of bridges charged to Bridge Division appropriation, which shows the large amount of work accomplished in excess of previous

years:

Western avenue to Cambridge		\$1,744 83
Broadway pier		3,56298
Beacon street (centre span).		1,150 00
Shawmut avenue		3,000 00
Essex street		903 85

\$10,361 66

The sum of \$903.85, which was spent in construction of Essex-street bridge, was in excess of the amount appropriated for the same. This was contract work under the Engineering Department.

The following bridges were partially reconstructed and repaired, and charged to Special Appropriations:

Congress street, Cornwall street, Elmwood street, Hyde Park avenue, Keyes street, Leyden street, Warren avenue.

On April 21 a careful inspection of Longwood-avenue bridge was made by the Town Engineer of Brookline and this division.

It was thought expedient to close the bridge, and by mutual agreement of the town of Brookline and city of Boston the bridge was closed to the public, and work of constructing a new bridge commenced at once.

An appropriation of \$150,000 was made for this bridge, half of the expense, \$75,000, to be paid by the town of Brookline, and half by the city of Boston, Park Department.

A stone bridge is now in progress of erection in place of the old wooden affair, and when completed will be the finest in the city.

Respectfully yours,

WM. H. CARBERRY,

Deputy Superintendent.

Total								\$4,482	75

A detailed statement of expenditures, and description of work performed follows; also a list of those bridges supported wholly or in part by the city of Boston; statement of the public landing-places; list of cable-houses and boxes; census of traffic taken on some of the most important bridges; number of draw openings made for navigation; width of draw openings, and table showing widths of bridges and kind of roadway and sidewalks.

TIDE-WATER BRIDGES.

Broadway bridge (over Fort Point channel).

Patched deck in various places, patched sheathing in numerous places, under seventeen orders issued at different times, or practically sheathed the bridge. Built new steps leading to float stage. Extensive repairs made on pier and fender-guard, repaired engines, machinery and water-way and made general repairs; repaired water-supply pipe leading to engine-room, and painted machinery.

#### APPENDIX B.

# REPORT OF THE DEPUTY SUPERINTENDENT OF THE FERRY DIVISION.

NORTH FERRY, EAST BOSTON, February 1, 1898.

MR. BENJ. W. WELLS,

Superintendent of Streets:

DEAR SIR: I respectfully submit the annual report of the expenditures, income and operation of the Ferry Division of the Street Department for the financial year ending January 31, 1898:

South Ferry, East Boston side, located at the termination of Lewis street, covering an area of 58,725 square feet of land and water. On these premises are one head-house, one coal-shed, one work-shop for carpenters, machinists and black-smith, one gate-room and oil-room, all in a very poor condition. Three piers which form the two ferry-slips, two drops and tanks, and one dock where boats are laid when not in use or while undergoing repairs.

South Ferry, Boston side, located at the termination of Eastern avenue, covering an area of 28,135 square feet of land and water, upon which is one head-house with canopies extending over driveways, one gate-room, three piers which

form the two slips, and two drops and tanks.

The wharf property adjoining these premises was leased by the Ferry Department in 1881 for 999 years, at a rental of \$4,000 per year. The whole of it is sub-let to the Public Institutions Department for \$2,000 per year, making a net loss to this division of \$2,000 a year, which should be borne by Public Institutions Department.

North Ferry, Boston side, located at the termination of Battery street, covering an area of 45,000 square feet of land and water, upon which are one head-house with canopies, one gate-room and steam-room, three piers which form the

two slips, and two drops and tanks.

North Ferry, East Boston side, located at termination of Border street, covering an area of 62,138 square feet of land and water, upon which are one head-house with canopy, boilerroom, oil-room, stable and coal-shed, three piers, which form the two slips, two drops and tanks.

There are eight drops. One new drop and tank have been built and put in place during the past year at South Ferry, East Boston side, and the City Engineer recommends that two more be built and placed in position. When this is done all the drops will be then practically new.

There are twelve piers, only two of which are in good condition, and extensive repairs should be made on the rest. Those at South Ferry, on both sides, are in very poor condition, especially on Boston side, where the south pier must be

entirely rebuilt.

The head-houses are all in good condition, with the exception of the one at South Ferry, East Boston side. Plans have been drawn for a new head-house and coal shed, and for the rearrangement of the slips at this landing, and it is hoped that before long this terminal will be equal, if not superior, to any of the others.

I again repeat my recommendation of last year that Battery street be widened from Commercial street to the ferry gates.

There are seven ferry-boats in use in this division, six of them week days and three on Sunday. One is a spare boat.

During the past year two of the boats the "Hugh O'Brien" and "East Boston" have been hauled out on railway and calked and coppered at a cost of almost \$4,000. A new propeller boat is undergoing construction and will be in commission about May 1, 1898. It will take the place of the "Ben Franklin," which has outlived its usefulness. The other five boats are in very good condition. The end of the "Hugh O'Brien" has been built up the past year, making her good for some time to come.

A new modern boat should be built to take the place of

the "Winthrop," which is now twenty-five years old.

During the past year every boat (with the exception of "Ben Franklin") has been thoroughly overhauled, both machinery and woodwork, and painted throughout. Electric lights have been installed on three of the boats as provided for by a special appropriation, making five of the seven boats equipped with electric lights.

Electric motors have been installed at all the landings, and it is now possible on this account to make schedule running

time, regardless of weather conditions.

The south pier at North Ferry, East Boston side, has been completely overhauled and repaired at a cost of \$2,000. This was imperative, as the pier was in a dangerous condition.

The landing at the South Ferry, East Boston side, was raised about 14 inches, this will prevent any but an extraordinary high tide rising over the landing. Previously

any little increase in the tide necessitated the use of planks

in order that passengers might reach the boats.

By reference to the financial and travel schedules you will see that the increase of receipts was \$4,369.60, increase of foot travel over 431,000 and of team travel 23,500.

Respectfully yours,

WILLIAM F. McClellan,

Deputy Superintendent.

BOSTON STREET AT EDWARD EVERETT SQUARE TO BE WIDENED AND CONSTRUCTED AS A PART OF COLUMBIA ROAD.

#### APPENDIX C.

# REPORT OF THE DEPUTY SUPERINTENDENT OF THE PAVING DIVISION.

ROOM 44, CITY HALL, BOSTON, February 1, 1898.

MR. BENJ. W. Wells, Superintendent of Streets:

Dear Sir: I respectfully submit the annual report of the expenditures and income of the Paving Division of the Street Department for the financial year ending January 31, 1898, showing the nature of the work, the number and variety of permits issued, and the details of expenditures involved in paving, macadamizing, regulating and constructing various streets.

Respectfully yours,

John L. Kelly, Deputy Superintendent.

The following table shows the amount expended for maintenance of the Paving Division and from special appropriations derived from loans for the last seven (7) years, not including the cost of street-watering, to be found on another page:

Maintenance.	Specials.	Totals.
1891 (13 months) \$872,936 40	\$1,014,324 26	\$1,887,260 66
1892 915,460 99	962,889 09	1,878,350 08
1893 745,681 52	707,801 49	1,453,483 01
1894 715,608 62	839,713 78	1,555,322 40
1895 683,899 42	823,011 70	1,506,911 12
1896 628,675 46	1,755,176 71	2,383,852 17
1897 690,187 34	1,413,142 79	2,103,330 13

PROPERTY IN CHARGE OF THE DEPUTY SUPERINTENDENT OF PAVING DIVISION.

Buildings and wharf on Albany street, opposite Sharon street. The building is of brick and wood, and covers some 8,000 square feet of land, and is divided into a shed for storage, black-smith's and carpenter's shops, tool-room and stable. The total contents of the lot, including wharf and building, are 63,180 square feet.

Fort Hill wharf, containing 21,054 square feet, placed in charge of the Paving Department May 18, 1874, to be used for the landing and storage of paving-blocks and gravel until such time as said wharf shall be wanted for the extension of Oliver street. The greater part of said wharf is occupied by the Sanitary Division as a garbage-dump, and the building thereon is leased to a tenant.

Lot on Chelsea, Marion and Paris streets, East Boston, containing 43,550 square feet. Part of this lot used by the Sewer Division.

Ledge lot on Washington street, corner Dimock street, Roxbury, containing 134,671 square feet. Upon this lot are buildings containing a steam-engine and stone-crusher.

Highland-street stable lot. Upon this lot is a large brick stable, erected in 1873, and occupied by the Sanitary and Paving Divisions; also a brick building used as a blacksmith's shop, and a shed for the storage of tools, etc.

Ledge lot on Codman street, Dorchester, containing 299,000 square feet, was purchased in 1870. Upon this lot is a shed

containing a steam-engine and stone-crusher; also a stable and tool-house.

On the Almshouse lot, Hancock street, Dorchester, there are two stables; also a shed and tool-house.

Ledge lot on Magnolia street and Bird place, Dorchester, containing 81,068 square feet. This lot was purchased by the town of Dorchester in 1867.

Downer-avenue lot, Dorchester, containing 35,300 square feet.

On Child street, West Roxbury, a lot of land containing 43,024 square feet, upon which are a stable and shed, blacksmith's shop, and tool-house.

Gravel lot in the town of Milton, on Brush Hill road, containing 64,523 square feet, hired by the town of Dorchester for nine

hundred and ninety-nine years.

Gravel lot on Morton street, Ward 23, containing about onethird of an acre, purchased by the town of West Roxbury in 1870, used for storage purposes.

Ledge and gravel lot, rear of Union street, containing about 37,000 square feet, purchased by the town of Brighton. This

lot is at present leased.

Ledge lot on Chestnut Hill avenue, Brighton, containing about thirteen acres, upon which are an office, engine-house, stable and crusher plant.

On Medford street, Charlestown, a wharf lot, foot of Elm street, containing 8,000 feet, upon which are sheds, office, stable, etc.

In South Boston, corner of H and Ninth streets, stable, carriage-house, shed, tool-house and office on leased land.

On Hereford street, a yard with shed, tool-house and office.

Wharf, known as Atkin's wharf, 521 Commercial street, purchased in 1887 for \$24,000, containing 22,553 square feet, having on it an office and stable.

On Centre street, West Roxbury, buildings containing engines,

stone-crushers, tools, etc., on leased land.

On Rosseter street, Dorchester, buildings containing engines, stone-crushers, tools, etc., on leased land.

On Heath street, Roxbury, buildings containing engines, stone-crushers, tools, etc., on leased land.

On Revere street, wharf for storing paving-blocks, etc.

Wharf on Chelsea street, East Boston, containing 61,000 square feet, with buildings purchased in 1897 for \$15,000.

Total	14,873
Total number permits for street openings Total number permits for all other purposes	14,017 $14,873$
Grand total	28,890

Three hundred postal cards and 1,500 notices have been sent to storekeepers and householders in connection with selling from windows, etc.

During the year there have been 14,683 notices sent the various foremen, directing them to repair defects in the public streets, which have been reported by the police and others; also 5,262 notices to private parties to repair work improperly done when permits had been granted to open the streets, and to owners of estates where coal-holes and sidewalk lights were defective.

There have been 452 notices sent to departments, corporations and others regarding proposed street improvements.

There have been 472 new bonds filed during the year.

There have been 125 claims investigated, and about 50 notices sent to owners and other parties.

Cash to the amount of \$12,798.50 for permits has been received and deposited with the City Collector.

There is \$7,519.50 due for permits at this date from corporations and departments.

Street numbers have been assigned to the estates in the different districts as follows:

City proper .		3 whole, and 5 parts of streets.
Dorchester District		9 whole, and 239 parts of streets.
Roxbury District		3 whole, and 67 parts of streets.

West Roxbury	4 whole, and	120 parts of streets.
Brighton District .	2 whole, and	46 parts of streets.
South Boston District.		29 parts of streets.
Charlestown District .	1 whole, and	17 parts of streets.
East Boston District .		21 parts of streets.

22 whole, and 596 parts of streets.

About 5,500 figures were required for this work. Plans of seventeen streets with numbers have been drawn ready for assignment when called for.

APPENDIX D.

OF THE DEPUTY SUPERINTENDENT OF REPORT THE SANITARY DIVISION.

ROOMS 917-920 TREMONT BUILDING, Boston, February 1, 1898.

Benj. W. Wells, Esq.,

Superintendent of Streets:

Dear Sir: I hereby respectfully submit the annual report of the expenditures, income and operation of the Sanitary Division of the Street Department for the financial year ending January 31, 1898.

Respectfully submitted,

PATRICK O'SHEA, Deputy Superintendent.

The work of the Sanitary Division includes the removal of houseoffal and the removal of house-dirt and ashes, accumulated from the burning of materials for heating buildings and for domestic purposes.

The following table shows the amounts expended for the maintenance of the Sanitary Division for the past five (5) years:

1893						. 0	\$481,300	63
1894							467,459	02
1895							432,778	52
1896							476,807	34
1897							492.670	56

Comparative Table, showing Net Cost of Maintenance of the Sanitary Division to the City of Boston.

			•	Expended.	Income.	Net Cost to City.	0
1893				\$481,300 63	\$32,056 27	\$449,244	36

OFFAL.

The method of disposing of offal and garbage during 1897 was, as in preceding years, to sell the material to farmers in neighboring towns, the portion not disposed of in this manner being towed to sea. Out of 56,783 loads collected during the past year in the city and suburbs, 43,207 loads, or 76 per cent., was fed to hogs, and 13,576 loads, or 24 per cent., carried in dumping-boats to the sea.

On April 1, 1897, the dumping and disposal of offal at Highland street, Roxbury, was abandoned, at the solicitation of the Board of Health, the Institutions Commissioner, and by vote of the City Council. By this action it has, to a certain extent, increased the cost of collecting offal in Roxbury and a part of West Roxbury, and decreased the revenue to the city from the sale of the material.

A more sanitary way of disposing of the city offal has long been under consideration, and, as the result of investigation made by a committee appointed by the city government, a contract for a term of ten years was made with the New England Sanitary Product Company, in January, 1898, by the provisions of which nearly 77 per cent. of the collection is conveyed to an isolated point within the city limits and treated by a method known as the Improved Arnold process, which disposes of it in an unobjectionable manner. Provision was also made for extending the scope of the contract so as to include the outlying sections of the city, when advisable.

During the year twenty-two new steel-bodied dumping wagons have replaced the same number of wooden wagons which were unfit for further service, and it is intended to substitute them generally for the wooden wagons, as they are much better adapted for

the collection of offal.

ASHES.

Of the 389,098 loads of ashes collected during the past year, 243,556 loads, or 63 per cent., were deposited on low lands in the outlying districts of the city; 100,905 loads, or 26 per cent., were towed to sea, and the balance, 44,637 loads, or 11 per cent., were

collected by contractors and used on low lands for filling.

The material designated "ashes" includes, besides the material itself, the general refuse of the city, such as store-sweepings, papers, and rubbish of all kinds, and our method of disposing of it has many objectionable features. Some of the refuse which is towed to sea is of such light composition that it often floats back to the neighboring beaches, and is the cause of frequent complaint from the residents. There has also been complaint from dumps unavoidably located near residential sections, owing to papers and

other light refuse being blown about by the winds.

It is the purpose of this division to obviate this difficulty, at least in a measure, by the erection, this year, of one or more furnaces, suitable for the burning of such combustible waste, arrangements for same being already in progress, and it is estimated that material, having a commercial value, which can be culled from the refuse, will cover the entire cost of the operation of the proposed furnaces. In view of this plan, householders in one section of the city were requested, nearly six month ago, to keep papers and other refuse of a combustible nature in a separate receptacle, or to tie the same in bundles, to facilitate their removal. The system has worked satisfactorily where it has been tried, and it will be further extended. Owing to the bulky nature of the material termed ashes, it was

Owing to the bulky nature of the material termed ashes, it was deemed advisable to enlarge the ash-carts by the addition of boards on the sides and ends, thereby increasing their capacity by about one-third. Some objection was made to this change by employees

in this division, but the introduction of a scales at one of the larger dumps soon demonstrated the utility of the measure, the average weight of several thousand loads collected in the enlarged carts being only 1,500 pounds. If the separation of papers and light refuse from ashes can be successfully compassed throughout the city, a suitable cart for collecting same will be introduced.

A change, productive of good results, was made in the collection of store-sweepings in what is known as the business section of the city, the occupants of stores, etc., being requested, by the distribution of printed notices, to put out all waste material previous to 7.30 A.M., so that the collectors could remove it while the streets were passable, much annoyance and inconvenience which had previously existed being in a large measure prevented.

I would again call your attention to the dilapidated condition of the stables in charge of this division, and earnestly recommend that

a special appropriation be made for their renovation.

Several complaints have been received concerning the failure of the division to promptly remove offal and ashes; investigation of these has usually shown that either offal has not been properly separated from ashes or other refuse, as is insisted upon by the department, or else that the receptacles were kept in some inaccessible place, or were larger than the ordinances provide and the regulations of the department permit.

In order that householders might understand these regulations and that the work be not unnecessarily delayed, the following circu-

lar was issued:

It will be noted that the circular also requires a third separation, viz.: that all refuse other than household ashes or offal be placed in a third receptacle. This was done in anticipation of an arrangement for caring for the combustible waste separate from the heavy ash by incineration.

Notice to Housekeepers.

On and after Monday, Oct. 11, 1897, nothing but GARBAGE, FOOD CANS and FOOD BOTTLES must be put into the garbage receptacles, and nothing but DUST and ASHES must be put into the receptacles for ashes.

ALL PAPERS, LIGHT WASTE and other GENERAL REFUSE must be placed in a third receptacle, or, if too bulky, must be tied in bundles to prevent their being scattered in handling, and MUST BE PROTECTED FROM THE WEATHER until collected by the proper authorities.

GENERAL REFUSE includes the following:

Paper, Excelsior, Old shoes and rubbers, Rubbish, Straw, Leather and rubber scraps, Bottles, Mattresses, Carpets, Rags, Old clothes, Tin cans, Pasteboard boxes.

The Superintendent of Streets of the City of Boston is required to remove ashes and OTHER REFUSE, and is governed by the following provisions of law.

provisions of law:

Acts of 1892, Chapter 419, Section 112.—All receptacles for ashes, waste and other substances, liable, by spontaneous combustion or otherwise, to cause a fire, shall be made of incombustible material, satisfactory to the inspector. Every building used as a tenement or lodging house shall have outside, and appurtenant to it, a suitable space, satisfactory to the inspector, for the temporary deposit of garbage and other refuse matter.

Revised Ordinances of 1892, Chapter 43, Section 14. — No person shall keep in his house, or on his land, any house offal, unless the same is placed in a suitable vessel, free from ashes and other refuse matter, and

so placed as to be easily removed.

Revised Ordinances of 1892, Chapter 43, Section 17. — No person shall place or keep in or near any building, ashes or cinders in such a manner as to be liable to cause fire, nor mix them with other substances, nor place or keep them except in metallic vessels, so placed as to be easily removed.

The Superintendent of Streets, therefore, calls attention to the necessity of keeping ASHES and OTHER REFUSE MATTER as required by law, and gives notice that NO REFUSE WILL BE REMOVED unless protected from the weather, and so placed as to be easily removed, and kept as follows:

1. ASHES must be kept free from all other refuse matter and in

metallic vessels.

2. HOUSE OFFAL or garbage must be kept free from all other refuse matter (except FOOD CANS and FOOD BOTTLES), and in

suitable vessels.

3. ALL OTHER REFUSE must be kept free from ashes and garbage and in suitable vessels, or in bundles firmly fastened, so as to prevent the rubbish from being scattered in handling.

Patrick O'Shea,

Deputy Superintendent, Sanitary Division.

Benjamin W. Wells,
Superintendent of Streets.

Also the annual spring cleaning of the entire city was undertaken with good results, and the following notice issued to the public:

CITY OF BOSTON.

Notice to Housekeepers and Tenants.

Housekeepers and other occupants of dwellings are requested to place their house and cellar dirt and sweepings in the streets opposite their premises between the hours of sunrise and 2 o'clock P.M. of the following days: Monday, May 3; Tuesday, May 4; Wednesday, May 5; Thursday, May 6; Friday, May 7, when they will be removed by the city carts. After which times no person will be allowed to place any dirt, ashes, filth or rubbish of any kind whatever in any of the ways, streets or places of the city, without a permit from the Superintendent of Streets.

Dirt of any kind not to be placed in the streets on Saturday.

BENJAMIN W. WELLS, Superintendent of Streets.

CITY HALL, BOSTON, 1897.

Note. — This circular, printed in English, Hebrew and Italian, was posted in prominent places by the regular bill-posting companies, and for a week was also carried on the sides of all the wagons and carts owned by this division.

Special Notice.

On and after above-named days, ashes, etc., in order to be removed by city carts, must be placed in receptacles not larger than an ordinary flour barrel, and in a position on a level with the grade of the adjoining sidewalk.

Vault filth, offal, bricks and mortar, gravel and earth, garden rakings and shrubbery are not included in the above, and will not be removed by the city if placed in the streets.

During the year the wheelwright, blacksmith, paint, harness and horseshoeing shops of this division at the South Yard were continued with competent mechanics upon the same basis as any journeyman shop in the city; the repairs and some constructive work of this and other divisions has been done cheaply and well. A statement of the work performed will be found on pages 225 to 236.

The following table shows the number of loads of house offal collected and removed in the last five (5) years:

	- 4	$oldsymbol{A} mou$	nt of	$^{\circ}$ Ho	use O	ffal .	Remo	ved.		
Year.						-			No.	of Loads.
1893		•								51,415
1894										50,637
1895										51,327
1896										56,402
1897										56,783

Each load of offal is equivalent to fifty-six (56) cubic feet, and has a maximum weight of one and a quarter $(1\frac{1}{1})$ tons at certain seasons of the year.

Of the amount, 56,783 loads, collected during the year 1897, 3,720 were collected by the East Boston contractor, 1,520 by the Brighton contractor, 4,712 by the Dorchester contractor, and 760 loads by the West Roxbury contractor, leaving 46,071 loads collected by city teams.

The collection of this material is attended to in winter by an average regular force of 75 city offal carts and 171 men, and on contract work 17 offal carts and 34 men, making a total of 92 offal carts and 205 men. At different times, and especially in summer, an approxi-

mate extra force of 21 teams and 42 men are employed.

The disposal has been made during the year in the following manner: The offal from the markets and the offal that is decayed is put on board a scow and towed to sea; the offal of Charlestown is taken to the yard at Malden bridge and there disposed of to farmers; the offal of East Boston is collected by a contractor and is removed to Revere; the offal of the city proper, Roxbury, a part of West Roxbury and South Boston is conveyed to the yard at the South End and disposed of to farmers, who remove it daily; a portion of the collections of West Roxbury is collected by contract and removed to Needham; the offal of Brighton is collected by contract and disposed of outside of the district; the offal in Dorchester is collected by a contractor and sold to farmers.

Collection and Disposal of Offal.

Year.	Total amount collected.	Amount sold.	Amount dumped on scow and towed to sea or wasted.	Per cent. wasted to total collection.	Amount of receipts from sales.
1893 1	46,276 loads.	30,824 loads.	15,363 loads.	30 per cent.	\$20,790 03

REMOVAL OF ASHES AND HOUSE DIRT.

The removal of ashes, house and store dirt has been attended to during the year by a minimum force of 330 men and 145 city carts, also by five carts with an East Boston contractor, seven carts with Dorchester contractors, and two carts with a West Roxbury contractor.

This work shows a constant increase from year to year, as will be seen in the following table, and is an indication of the actual growth of the city:

Amount of Ashes, House and Store Dirt Removed.

Year.					No. of Loads.
1893 .					320,571 of 44 cubic feet
1894 .					326,798 " " " " "
1895 .					336,886 " " " " "
1896 .					363,975 " " " " "
1897 .					1389,098 " " " "

¹Previous to the year 1897, each load of ashes contained about 44 cubic feet. During the year 1897 all the ash carts owned by the city were equipped with side-boards, increasing their capacity to 54 cubic feet, but for the purpose of comparison the old basis has been used.

The following table shows the force engaged in this collection throughout the entire city:

The Force Employed.

The money received from the sales of house offal is deposited monthly with the City Collector, and then credited to the sinkingfund of the City of Boston.

House Dirt and Ashes.

In the collection of house dirt and ashes there are employed 361 men and 159 carts. This material is removed from hotels, tenement

houses and stores daily; from dwelling-houses once a week.

The City Ordinances of 1892 (chapter 36) require that house dirt and ashes shall be kept in an easily accessible place for their removal, the men being obliged to enter the yards and remove the receptacles to the sidewalks, where their contents are dumped into the carts. The receptacles are then placed in their original position. The material is disposed of, if possible, on low lands, being used for filling, and is also dumped on scows, to be carried to sea. Of the amount collected last year, 26 per cent. was disposed of in this manner, viz., carried to sea.

There are four sections of the city let out by contract for the collection of house dirt and ashes. Dorchester contracts—South is held by Denis Flynn, and North Dorchester by John McShane; East Boston, by W. F. Hedrington, and a part of West Roxbury by John

J. Moore.

The entire city proper, including Roxbury and a part of West Roxbury, together with South Boston, Charlestown and Brighton, are now done by day labor.

House Offal.

There are employed in the removal of house offal 205 men and 92 wagons. The offal is removed from dwelling-houses twice a week during the summer months, and once a week during the winter; from hotels, markets and restaurants it is removed daily. The men are required to enter yards, collect the offal, empty into wagons and deliver at the depots, located as follows: One on Albany street, one at the Almshouse, Charlestown; also to the dumping-boats located at Fort Hill Wharf on Atlantic avenue.

The offal is largely sold to farmers of adjoining towns; the remainder is dumped on the scows and carried to sea. About 24 per cent. of the quantity collected during the past year has been disposed of in this manner. The Dorchester, Brighton, East Boston and West Roxbury contractors dispose of offal at present in the same manner as the city itself, by sale to farmers.

At present there are four sections of the city let out by contract for the collection of house offal: East Boston, by T. Mulligan; Dorchester District, by John Bradley; Brighton District, by D. B. Morrill, and a portion of West Roxbury by George T. Barnes.

The cash revenue received from the sale of house offal for the

past five years has been as follows:

1893												\$20,790	03
1894												26,262	40
1895	•	•					•	•	•		•	27,374	47
1896		•		•	•	•	•	•	•	•		21,884	
1897 1			•		•					•		17,416	75

DIVISION REPAIR SHOPS.

Located at the South End yards, situated at No. 650 Albany street. At these shops all of the repairs on carriages, carts, wagons, etc., are made, together with the painting of the same; all harnesses are repaired and many made, and a portion of the horseshoeing done.

The mechanics in these shops are engaged also in making repairs on the vehicles, etc., sent by the different divisions of the Street Department; all street signs are painted for the Paving Division, and a certain amount of the horseshoeing is done for the several

divisions.

WHEELWRIGHT SHOP.

Cost to maintain during the past year the sum of \$9,471.19, of which amount \$3,524.40 was expended for labor, and \$5,946.79 for stock. The carts, wagons and other vehicles of the division were properly overhauled, when in need of repairs, and the entire lot of ash and offal sleds were put in proper working order. Of the above amount expended in maintaining these shops, the following amounts were charged off to the several divisions, and others, for repairing, altering and putting in good condition their carts, wagons, watering-carts, sleds, etc.:

Paving Division				\$2,643 62
Sewer Division				1,229 86
Street Cleaning Division	•			45 16
Bridge Division				28 64
Street Watering Division				84 11
Central Office				177 60
County of Suffolk				4 80
				\$4,213 79

This leaves a net cost of \$5,257.40 for the repairs and construction of all work of this character for the Sanitary Division.

There are employed in this shop four wheelwrights and one helper.

¹On account of the severe snowstorm of February 1, 1898, the last monthly deposit for the year 1897 was not credited to the Sanitary Division by the City Collector, for the reason that the check, amounting to \$1,335.25, was received too late on abovenamed day.

BLACKSMITH SHOP.

Cost to maintain during the past year the sum of \$6,836.41, of which amount, \$5,069.65 was expended for labor, and \$1,766.76 for stock. The carts, wagons and other vehicles of the division were properly overhauled when in need of repairs, and the entire lot of ash and offal sheds were put in proper working order. Of the above amount expended in maintaining these shops, the following amounts were charged off to the several divisions, for repairing, altering and putting in good condition their carts, wagons, watering carts, sleds, etc.:

Paving Division						\$1,488 73
						1,500 63
Street Cleaning Division .						28 13
Bridge Division						58 83
Street Watering Division		•	•	•	•	112 66
Central Office	•	•	•	•	•	328 87
						@9 E17 OE
						\$3,517 85

This leaves a net cost of \$3,313.56 for the repairs and construction of all work of this character for the Sanitary Division.

There are employed in this shop six blacksmiths and one helper.

PAINT SHOP.

Cost to maintain \$7,098.71, of which amount, \$5,941.97 was expended on labor and \$1,156.74 for stock. The work done by this shop was the painting and lettering of that which was either built or repaired in the wheelwright or blacksmith shops, together with 1,186 different styled signs that were painted for the Paving Division. Of the above amount expended for maintaining this shop, the following amounts were paid by the several divisions of the departments for painting carts, wagons, buggies, signs, etc.:

Paving Division								\$2,217 78
Sewer Division								940 49
Street Cleaning Div	visio	n.						783 09
Bridge Division								21 27
Street Watering I)ivis							197 06
Central Office .								215 54
County of Suffolk								85
County of Surface	•	•	•	•	•	•	•	
								\$4,376 08
								#-,5.0 00

Leaving the balance, \$2,722.63, as the cost of this work for the Sanitary Division.

This shop employs seven painters and three helpers.

HARNESS SHOP.

Cost to maintain \$5,057.52, of which amount, \$3,178.46 was expended for labor, and \$1,879.06 on stock; part of the work sent to the blacksmith and wheelwright shops was also repaired here, such as Goddard and Concord buggies, leather seats for wagons, etc., together with all the new pieces of harness made for the several divisions. The entire lot of old and new harness owned by the

Sanitary Division has, during the year, been overhauled, repaired and oiled at this shop. Of the above amount paid out for maintaining this shop the amounts charged to the several divisions of the department for work done were as follows:

Paving Division						\$219	39
Sewer Division						610	54
Street Cleaning I	Division					192	63
Bridge Division				•		15	28
Street Watering	Divisio	n					69
Central Office .						89	00
County of Suffoll	ζ.					1	24
						\$1,155	77

Leaving balance, \$3,901.75, as the net cost of work done for the Sanitary Division.

This shop employs three harness-makers and one helper.

Horseshoeing Shops.

Cost to maintain during the past year: South Yard, \$3,711.04; West Yard, \$2,213.79, of which amount, \$3,136.13 was expended for labor at South Yard, and \$1,751.02 at West Yard, and for stock at South Yard \$574.91, and for West Yard \$462.77. All of the horses at the South Yard, together with the Street Cleaning Division horses stabled there, as also some of the horses located in the different stables of this division, and of other divisions of this Department, are shod at these shops, and for which the several divisions were charged the following amounts :-

	South Yard.	West Yard.
Paving Division	\$96 95	\$21 25
Sewer Division	586 05	302 75
Street Cleaning Division	992 70	801 32
Central Office		160 75
County of Suffolk		115 50
County of Suffolk		14 75
	\$1,675 70	\$1,416 32

Leaving balance of \$2,035.34, South Yard, as the cost to the Sani-

tary Division for this class of work.

Leaving balance of \$797.47, West Yard, as the cost to the Sanitary

Division for this class of work.

These shops employ three horseshoers at South Yard and two at West Yard.

PLANT AND PROPERTY IN CHARGE OF THE SANITARY DIVISION.

South City Stables, Shops and Sheds.

Situated on Albany street, opposite Newton street. The lot belonged to the city before being used for this purpose, and con-

tains 90,780 feet.

The stable and buildings connected therewith are of brick. There are also on the premises five wooden sheds, used for storing wagons, etc. The stable is two stories high, with French roof, and has accommodations for 100 horses. Twenty-three horses are kept in sheds. Total original cost, exclusive of land, \$79,089.23.

Connected with stables are blacksmith, wheelwright, paint and harness-makers' shops, in which the wagons, carts, harnesses, etc., used by the department are constructed and kept in repair; also a horseshoeing shop for shoeing the horses of the department located

in this section of the city.

Offal Depots.

Erected in 1864, on the wharf fronting on Albany street, opposite Brookline street, on the other side of the dock from that used by the Paving Division. The lot which the building occupies and the yard attached to the same contains 39,511 feet, and belonged to the city before being used for this purpose. Total original cost of building \$18,578.89. This building is used for the deposit of house-offal daily collected in the city carts, and from which it is thence conveyed without the city limits by purchasers.

West Stable and Sheds.

The stable is a brick building, a story and a half high, 128 feet by 50, located on North Grove street, built in 1860, with suitable outbuildings attached to the same. It has accommodations for 83 horses, in stables and sheds. The lot contains about 45,152 square feet. On May 11, 1896, a horseshoeing shop was established for the purpose of shoeing the horses of the department stabled in this section of the city.

$Highland\ Stable.$

With accommodations for 72 horses, on the old Almshouse lot, Highland street, containing 81,082 square feet. A part of this stable and adjoining lot is used by the Paving Division. There is on this lot a brick stable, which cost \$88,594.13. On this lot is an offal-shed, erected in 1875, at a cost of \$1,160.12.

During the year the stabling of horses in the basement of this building was abandoned and 15 stalls were placed in the second story of the building at a cost of \$3,000. April 1, 1897, the offalshed erected in 1875 was abandoned, and renovated for the purpose

of storing wagons and carts.

Charlestown Stable.

With accommodations for 25 horses, is situated on Rutherford avenue; lot contains 17,300 square feet of land; stable built in 1875, cost \$5,083.07; sheds and out-buildings built in 1879.

Fort Hill Wharf.

Containing 21,054 square feet, placed in charge of the Sanitary Division, used as a dumping station for the city's garbage and refuse, and as a landing place for scows, which convey this stuff to sea. There are two dumping-boats, known as the Barney dumping-scows, and these are in continual use for the above purpose, and are towed to sea by the Street Department steam tug boat "Cormorant." The tug boat is also used by the Sewer Division.

A portion of this wharf is used by the Street Cleaning Division as a locker for push patrol-carts, etc.; a part is in charge of the Paving

Division, and a portion occupied by a tenant.

Gibson Street Plant.

Containing 42,000 square feet, and situated in Dorchester district, which has been used and occupied by the New England Construction Company for the treatment and disposition of offal, and which is now closed.

On September 3, 1897, the Street Cleaning Division commenced to feed and care for the horses belonging to that Division, and stabled at 650 Albany street and North Grove street.

The Sanitary Division still cares for the horses of this Division located at Rutherford avenue and Highland street, bearing a proportionate share of the cost of maintaining both of these stables.

All of the stables and sheds under the charge of this Division need thorough repairs, no extensive repairs having been made for years, and a special appropriation for this purpose should be granted by the City Council.

APPENDIX E.

REPORT OF THE DEPUTY SUPERINTENDENT OF THE SEWER DIVISION.

30 TREMONT STREET, Boston, February 1, 1898.

MR. BENJAMIN W. WELLS,

Superintendent of Streets:

Dear Sir: I respectfully submit report of the expenses, income and operations of the Sewer Division for the financial year ending January 31, 1898.

Yours truly,

CHARLES R. CUTTER,

Deputy Superintendent.

The Sewer Division has charge of the following work:

- 1. Construction and maintenance of all sewers and catchbasins.
 - 2. Completion and maintenance of the Main Drainage Works.
- 3. Construction and maintenance of the channels of Stony brook.
- 4. Construction and maintenance of street culverts and surface drains.
- 5. Preparation of plans and the engineering and supervision required in the construction and maintenance of all work connected with the division.
- 6. Investigation of complaints in regard to defective sewerage and surface drainage.
- 7. Granting of permits for all connections to be made with the common sewers, and the custody of bonds filed by drain layers authorized to make such connections.
- 8. Levying of assessments on estates benefited by the construction of sewers.

The following table shows the maintenance appropriation of this division for the past ten (10) years:

1888			\$261,361	00
1889			268,230	00
1890			347,000	00
1891			350,000	00
1892			350,000	00
1893			350,000	00
1894			320,000	00
$\cdot 1895$			300,000	
1896			280,000	00
1897			300,000	00

A general statement of the work done during 1897, and work necessary to be done, is given in the succeeding pages:

South Boston.

During the past year B and Seventh-streets overflow, the sewer in Dorchester avenue, between B and D streets, and the sewer in Dorr street have been completed.

The sewers in the following streets should be attended to

in the immediate future:

B street, between Dorchester avenue and Fourth street, Dorchester avenue, between D and Dorchester streets, D street, between Dorchester avenue and Eighth street and Dexter and Ellery streets. The Mercer-street sewer should be enlarged, and a beginning made on the Kemp-street outlet, and as much of this as lies in the proposed location of Columbia road will have to be built immediately.

Sewers in the following streets should receive attention during

the coming year:

From D street to B street, Silver street from B to Dorchester streets, Bolton street from B to Dorchester streets. Although there are many others in poor condition which should be rebuilt, those above mentioned are the most troublesome.

CHARLESTOWN AND EAST BOSTON.

The work on the connections with the North Metropolitan sewer in Charlestown and East Boston should be continued and

completed during this coming year.

The building of a new outlet of ample dimensions to relieve the territory in the vicinity of Tibbetts town way, the rebuilding of the Beach-street outlet and sewer in Cambridge street (which should be done previous to the raising of the grade of Cambridge street) and the rebuilding of the Rutherford-avenue sewer will constitute the work in Charlestown.

In East Boston the rebuilding of the Porter street and Putnam

street outlets should be attended to this year.

During the past year the following connections with the Metropolitan sewer have been made in Charlestown:

Chelsea street at Vine street, Chelsea street at Medford street, Rutherford avenue near Miller street; the Rutherford-avenue sewer from outlet near Miller street to Chapman street has been rebuilt to proper size, replacing an old broken-down sewer.

The connections which have been made during the past year in East Boston are: Marginal street at Ruth street, Marginal street at Cottage street, Porter street at Bremen street, Border street at Eutaw street, Border street at Lexington street, Border street near Decatur street, Sumner street at New street, Cottage street at Maverick street, Lamson street at Maverick street, Jeffries street at Maverick street, Sumner street at Jeffries street.

Brighton.

The sewer for Cambridge street, between Seattle and North Harvard streets, has been built, and the remainder, between Seattle street and the Charles river, started. This sewer will be completed early in the coming year. Sewers have also been built in Strathmore road, Sidlaw road, between Commonwealth avenue and Chiswick road, Chiswick road, between Sidlaw road and Chestnut Hill avenue, Washington street, between Nantasket avenue and Commonwealth avenue. Commonwealth-avenue outlet, between Lake street and Commonwealth avenue, was finished this year. One of the most important undertakings in Brighton this coming year will be the sewering of the Aberdeen district, which should be sewered on the separate system; both house sewers and surface drains being built at the same time, inasmuch as the house sewer will have to find an outlet through the Brookline system, which is, in this neighborhood, a strictly separate system.

West Roxbury.

In the Mt. Hope district 8,113 linear feet of pipe sewers on the separate system have been built. During the coming year the system should be completed by the building of the surface drains and improvement of the brick channels which traverse this district. The Perkins-street sewer, between Jamaicaway and Centre street, has been completed.

In the neighborhood of West Roxbury and Spring-street stations and the New York, New Haven & Hartford Railroad there are large areas which have for a long time been partially developed. It is probable that during the coming year a large amount of sewer building will be done in this part of West Roxbury, owing to the completion of the Neponset-valley Metropolitan sewer through this territory. These sewers will be on a strictly separate system, and will require long outlets, varying from 2,500 feet to 7,000 feet in length.

This work should be undertaken and carried on as rapidly as possible, as the cesspools from the houses now drain in the neighborhood of the Brookline pumping-station.

The proposed abolition of grade crossings at Roslindale and Spring-street stations will necessitate some changes in the surface-drainage system at these points, and at the former point will allow proper development of the sewer system for the Hewlett-street district, which has been held back on account of these proposed changes.

DORCHESTER.

In the Forest-avenue and Lauriat-avenue districts the following

streets and parts of streets have been sewered:

Evans street, the southerly end of Nelson street, the southerly end of Fuller street, Fairmount street, and parts of Capen, Selden and Morton streets, Lauriat avenue, Chapman avenue, Birch street, Oak terrace, Mountain avenue, Dumas street, Mascot avenue, Willowwood street, a part of Ballou avenue, Rosseter street and outlets.

The following streets remain to be sewered, and should be

attended to the coming year:

Corbet street, Hopkins and Dyer streets, the southerly ends of Selden and Fuller streets, the northerly end of Nelson street, Norfolk and Maxwell streets, the remainder of Morton street, West Selden street, Carlos and Don streets, part of Lauriat avenue near the railroad station, Lauriat street, Tucker street, Lyons street, Jones avenue, Middleton avenue, remainder of Ballou avenue and Morton street, and a part of Norfolk street.

In the Dorchester Lower Mills village the following streets are

well settled, and should be provided with sewers:

Monson street, River street, part of Temple and Morton streets, part of Dorchester avenue, Bellows place, Idaho street, Avondale place, part of Codman street and Cedar street.

In the neighborhood of Talbot avenue the following streets

remain to be sewered:

Bernard street, Spencer street, Millet street, Clarence place, Melbourne street, Wrentham park, Torrey street, Waterlow street, Peverell street and Hewins street.

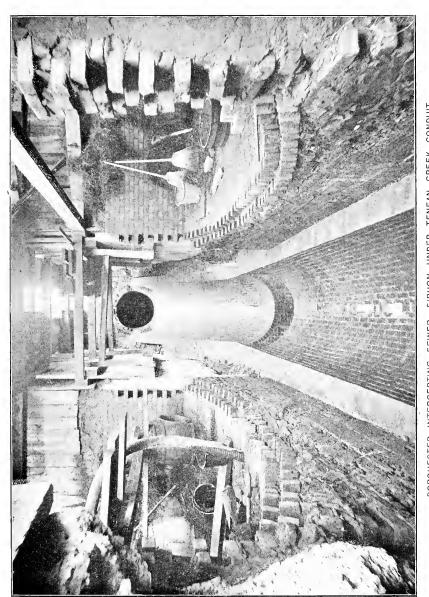

In the northern part of Dorchester, work on the Columbia-road boulevard will be pushed to completion. A new sewer system will be constructed for the northern half of Savin Hill, including the portion of Savin Hill avenue between the railroad and Grampian way.

The Rosemont and Mill streets main sewer will be carried on in connection with the building of the covered channel for the

southern branch of Tenean brook.

ROXBURY.

About 2,100 feet of the West Roxbury low-level sewer has been built this year, and the sewer system on Columbus avenue, between the Roxbury crossing and Dimock street, is in progress, and will be completed at an early date. The Dorehester-brook sewer has been extended from Norfolk avenue to Clifton street.

DORCHESTER INTERCEPTING SEWER-SIPHON UNDER TENEAN CREEK CONDUIT.

In all probability no further construction will be necessary on

this sewer for a number of years.

The long-needed rebuilding of Harrison avenue main sewer has been nearly completed this year, and the building of this sewer will enable the city to rectify the sewer system of the adjacent territory. Sewer systems have been built in Peterborough

street and in Parker, Turner and Norway streets.

The coming year the sewer in Hemenway street, formerly Parker street, will have to be rebuilt between Norway street and the passageway south of Boylston street. This is a continuation of the work of last year, when this sewer was rebuilt from Westland avenue to Norway street. The building of this sewer will enable the city to rebuild the pipe-sewer in the beforementioned passageway, which has been a source of endless trouble and annoyance. The sewer system of the proposed Ipswich street will be completed the coming year, and at its southerly end a connection will be made with the brick sewer in Boylston street, between Hemenway street and the Parkway. This latter sewer has settled so badly that a portion of it pitches the wrong way; but by making the proposed connection it will be drained out by the Ipswich-street sewer, and will not have to be rebuilt.

It is hoped that the division will be able to build the housesewers, recommended in several previous reports, on the sides of the old Stony-brook channel, between Huntington avenue and Elmwood street, in connection with the rebuilding of this old channel.

The Muddy-river conduit in Brookline avenue should be repaired, and a considerable portion of it rebuilt. This will be a very expensive work. A surface-drain should be built in Heath street, between Huntington avenue and Lawn street.

When the Huntington-avenue boulevard was completed, this surface-drain was started and carried to the line of the avenue. It should be completed the coming year, as the Heath-street sewer is entirely inadequate to take the floods of surface-water which come down this street.

The sewer system in the new avenue called South Huntington avenue has been built on the separate system, in anticipation of the building of this surface-drain in Heath street, and the catchbasin drain on the new avenue has been connected temporarily with the sewer in Heath street, which, of course, increases the flood of water in the latter sewer.

The relief-sewer for the Notre Dame-street district will be completed the coming year. This sewer was carried up as far as the line of Columbus avenue at the relocation of Dimock street, and left there for the purpose of further extension when Columbus avenue was built.

This sewer will, when completed, relieve the Notre Damestreet district, which has suffered for many years from floods of surface-water. The sewer in Haskins and Benton streets will be rebuilt, and the overflow or surface-drain for the Vila-street district should be built, if arrangements can be made with the Park Department for the location of the same, and also for paying a portion of the expense of building.

CITY PROPER.

The Canal-street relief sewer was begun last year in Central street and has been carried on through India and Commercial streets, and part way through Clinton street. This will be carried on the coming year, and probably completed to the connection with the Canal-street sewer, near Causeway street.

The route of this sewer, which was projected through Clinton and Blackstone streets and Haymarket square, has been changed on account of the fact that the Rapid Transit Commission have determined to build a subway in Hanover street. The grade of this subway will be so low that it will be necessary to build a siphon on the Canal-street relief sewer if it crosses Hanover street at Blackstone street.

The route has therefore been changed, and this sewer will be carried from Clinton street, through Fulton and Cross streets to Haymarket square, for the reason that at the point where Cross street crosses Hanover street the proposed grade of the subway is high enough to allow the sewer to be carried under it without siphoning.

Sewers have been built in Atlantic avenue, thus removing the pollution from the Mercantile Wharf and adjacent docks; in Charles and Allen streets, relieving the condition of the sewer system in Brighton and Allen streets, and in South Market street

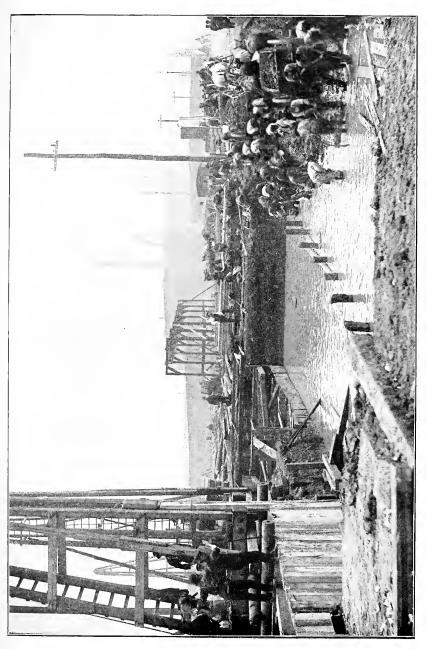

and many other small streets.

The Rapid Transit Commission, in connection with other work, have rebuilt sewers in Adams square, Beacon and School streets, Cornhill, Hanover street, Tremont street and Tremont row and

Washington street.

The building of the South Union Station has resulted in a general remodelling of the sewer system in this part of the city. The sewers in Beach, East, Essex and Summer streets have been combined and a new outlet sewer built in Summer-street extension.

About 700 feet of the interceptor in Cove street has been rebuilt and carried around the head house of the station, and a very large sewer built from Cove street across the Terminal Company's land, a short distance north of Mt. Washington avenue, which is designed to take the sewage of Kneeland and Harvard streets districts. On account of the low grade at which the railroad subway is designed across Mt. Washington avenue, this sewer had to be very much depressed. The crown of the sewer being at Grade 3, and as there was not sufficient weight of material over the sewer to resist tidal pressure, a particular form of construction was adopted, the arch of the sewer

being held down by bent rails which are carried over the sewer and bolted down on each side of the sewer to the pile caps underneath.

Future Work in this District.

The most important work which is contemplated for the coming year in the city proper, is the completion of the terminal sewers before mentioned, and continuing the large sewer under the railroad yard up Kneeland and South streets from the interceptor to Harvard-street sewer.

A district regulator will also be built on the interceptor near Summer street, and a regulator in Kneeland street, near Cove street, connecting with the interceptor by a small brick sewer in Kneeland street. At the request of the Terminal Company a portion of the intercepting sewer near the location of the gasholders at Federal-street bridge will be rebuilt, in order to enable the city to abandon the portion of the existing interceptor which crosses under the proposed location of the Terminal Company's subway at this point. The house sewer will be built in the new Dorchester avenue between Summer street and Mt. Washington avenue. In other parts of the city the North Market-street sewer and the sewers in India, Milk and adjoining streets are in bad condition and should be rebuilt.

In Commercial street, near Clark street, the sewer system is old and excessively leaky, and must be remodelled and probably entirely rebuilt, as the tide rises and falls freely in these sewers at the present time.

The Legal Grade of Cellars.

This subject has been discussed in the report of 1896, but attention should be called to it again on account of its importance. The present legal grade, according to the building law, is Grade 12.

This is evidently founded on the assumption that the ordinary run of high tides is, on the average, up to Grade 10. While this is true there are very many tides which go above this point, and even up to Grade 14. It is not at all uncommon for the tide to reach Grade 12 at the same time that a rain storm is in progress. This of course is hard to overcome in designing sowers

A sewer should be, if possible, of such a size that it will carry off the storm water without allowing the level of the water to get above that of the cellars. This is a theoretical impossibility whenever the tide reaches Grade 12.

The only device which could be adopted to help matters under these circumstances, is to build the sewer much larger than would be needed simply to convey the storm water, so that it will take a little while to fill up this extra space. In other words the sewers must provide a storage space. This requirement results in a large increase in the cost of all sewers in tidal districts. The legal grade should be raised to Grade 14.

There is another aspect to this problem of the legal grade of cellars and that is, that, as at present established, this grade bears no relation to the grade of the street in which the sewer lies. It really only applies in tidal districts, for it would be absurd to suppose that it was intended to allow cellars on high land, perhaps 50 or 100 feet above tide water, to be carried down to Grade 12, and to impose any obligations upon the city to drain cellars to such unusual depth.

In addition to changing the legal grade from 12 to 14, the ordinance should be amended so as to establish a relation between the grade of the street in which the sewer lies and the allowable depth of cellars. This would be best founded upon custom, and probably the depth of 8 feet below the grade of the street would cover all ordinary cases. If such a grade were established then a builder, who chose to put in a cellar of unusual depth, would understand that he could not expect to find the sewer system low enough to drain him by gravity, and that he must provide means for raising his sewage by some form of pumping.

Control of House Connection.

As the law stands at present this division supervises only the connection of private drains with the sewer, and has no control over the laying of the drain from the sewer to the house. The drain-layer may or may not make good work of this portion.

This makes a difference to this division in many cases where the work is in wet ground, as it allows a large amount of leakage from ground water to find its way into the sewer system. If a drain is improperly laid it also results in trouble to this division, because when a drain becomes stopped up a complaint almost invariably is made that the public sewer in the street is stopped up and the owner of the house refuses to go to any expense on his private drain until the fact is demonstrated to him that the public sewer is in good condition.

This division should either build all private connections by day labor, or should have supervision over them from the sewer to the point where the Superintendent of Plumbing, under the build-

ing law, assumes control.

In this connection it should be noted that the inspectors of this division should have the right to enter buildings in order to find out from what houses matter deleterious to the sewers is being emptied, and to make tests, etc. These inspectors, together with the engineers, who have to enter many buildings to get the grades of sewers, should be furnished with badges, in order to assure the occupants of the buildings that they are properly authorized agents of the city of Boston.

Main Drainage.

In connection with the main drainage works, contracts have been entered into for the enlarging of the sewage storage reservoirs at Moon Island, the capacity of the old ones having been fully reached. A considerable improvement has been brought about at the pumping-station at the Cow Pasture, contracts having been let for the thorough overhauling of the present machinery, and also a contract made with Mr. E. D. Leavitt to design the new 72,000,000 gallons sewage pump; and the coming year will bring about changes of great value in the main drainage system.

Stony Brook.

The construction of that portion of Stony-brook channel lying between the gate-house on Pynchon street and the channel built by the New York, New Haven and Hartford Railroad, near Centre street, has been continued and nearly completed.

Agreement as to the Use of Sewers of the City of Boston.

The Board of Metropolitan Sewerage Commissioners, constituted under the authority of chapter 439 of the Acts of the year 1889, acting for the Commonwealth, and the Mayor of the city of Boston, acting for said city, authorized thereto by chapter 502, of the Acts of the year 1897, make the following agreement, viz.:

ARTICLE 1. Said board shall connect the Charles-river Sewerage System for the disposal of the sewage of the Charles-river Sewerage District, consisting of the cities of Waltham and Newton and the towns of Watertown and Brookline and a part of the city of Boston, with the sewer of the city of Boston at the corner of Gainsborough street and Huntington avenue in said city of Boston, and shall connect the Neponset Sewerage System for the disposal of the sewage of the Neponset Sewerage District, consisting of the towns of Dedham, Hyde Park, Milton, Westwood and a part of the city of Boston, with the sewers of the city of Boston at Granite bridge.

ARTICLE 2. The city of Boston shall discharge the sewage from said systems through its sewers and other works into the water at Moon Island.

ARTICLE 3. The Commonwealth shall pay to the city of Boston, for the use authorized by said last-mentioned act, of said city's sewers and sewerage works by the Charles-river Sewerage District, and for the discharge by the city of Boston of the sewage from said Charles River Sewerage District through said city of Boston's sewers and sewerage works, as follows, to wit:

(a.) For the year 1896, and for the year 1897 (to be paid in the month of January, 1898) the sum of twenty-eight thousand and seven (28,007) dollars for each year in addition to the sum already paid for each year.

(b.) For the year 1898 (to be paid in the month of January, 1899) the sum of forty-one thousand five hundred and fifty-nine (41,559) dollars; for the year 1899 (to be paid in the month of January, 1900) the sum of forty-one thousand five hundred and fifty-nine (41,559) dollars; for the year 1900 (to be paid in the month of January, 1901) the sum of forty-one thousand five hundred and fifty-nine (41,559) dollars; each of said sums to be increased by the amount of seventy-four (74) per cent. of one-fifth of the interest paid by the city of Boston on the cost of construction of all said sewers and works forming a part of such portions of said city of Boston's system of sewage discharge and works lying between Gainsborough street and the point of discharge into the water at Moon Island, as shall have been constructed after October 1, 1897, and prior to the month of January in which the payment is to be made; provided, however, that no part of the cost of construction of any sewer or work hereafter constructed which said board and said Mayor shall agree, or in case they cannot agree, which a third person selected by said board and Mayor shall find, ought not to be paid by the Commonwealth, shall be used in determining any such amount.

ARTICLE 4. The Commonwealth shall pay to the city of Boston for the use authorized by said last-mentioned act of its sewers and sewerage works for the Neponset Sewerage District and for the discharge by the city of Boston of the sewage from said Neponset Sewerage District through said city of Boston's sewers

and sewerage works as follows:

(a.) For the year 1898 (to be paid in the month of January, 1899) the sum of sixteen thousand three hundred and eleven (16,311) dollars; for the year 1899 (to be paid in the month of January, 1900) the sum of sixteen thousand three hundred and eleven (16,311) dollars; for the year 1900 (to be paid in the month of January, 1901) the sum of sixteen thousand three hundred and eleven (16,311) dollars; each of said sums to be increased by the amount of twenty-six (26) per cent. of the interest paid by the city of Boston on the cost of construction of all said sewers and works forming a part of such portions of said city of Boston's system of sewage discharge and works lying between Gainsborough street and the point of discharge into the water at Moon Island, as shall have been constructed after October 1, 1897, and prior to the month of January in which the payment is to be made; provided, however, that no part of the cost of construction of any sewer or work hereafter constructed which said board and said Mayor shall agree, or in case they cannot agree, which a third person selected by said board and Mayor shall find, ought not to be paid by the Commonwealth, shall be used in determining any such amount.

ARTICLE 5. The Commonwealth shall pay to the city of Boston for the year 1901, and for each and every year thereafter for the use aforesaid by each of said districts, such sum as shall be determined in accordance with the provisions of chapter 502 of

the Acts of the year 1897.

ARTICLE 6. If other provision for the discharge of said sewage from said Charles-river Sewerage District and said Neponset Sewerage District, and payment therefor, shall in any year after the date hereof be made by act of the Legislature of the Commonwealth, the compensation for that year shall be such as the Legislature shall provide in such act, and the compensations, if any, provided for in this agreement for subsequent years, shall be null and void.

Signed this December thirty-first, 1897.

Commonwealth of Massachusetts,
By Hosea Kingman,
Tilly Haynes,
George A. Kimball,

Board of Metropolitan Sewerage Commissioners.

CITY OF BOSTON,
By Josiah Quincy,
Mayor.

FINANCIAL STATEMENT.

Sewer assessments have been made by this division for the year ending January 31, 1898, in accordance with chapter 402 of the Acts of 1892, and amendments thereto, to the amount of \$39,534.95, and the bills have been deposited for collection with the City Collector.

Bills for sewer assessments amounting to \$2,738.40 have also been deposited for collection, representing those estates assessed under chapter 456 of the Acts of 1889, and amendments thereto, which have been connected with the public sewers during the year; making the total amount of assessments deposited for collection, \$42,273.35.

There remain on the books of this division, at 5 per cent. interest, \$25,308.24, representing the assessments under the Acts of 1889, and amendments thereto, for those estates which have not been connected with the sewer for which they were assessed, and bills for which will be deposited for collection as the connections are made. This sum represents 19.5 per cent. of the total assessments made under those acts.

Entrance fees to the amount of \$3,338.24 have been collected from estates upon which no sewer assessment was ever paid, in accordance with chapter 36, section 10, of the Revised Ordinances.

Permits have been issued to licensed drain-layers to make 4,194 connections with the public sewers, and the work done under these permits has been inspected, and a record of the same made on the plans of this division.

The following tables and statements will show the amount of money expended and work done by this division during the year:

Financial Statement.

APPENDIX F.

REPORT OF THE DEPUTY SUPERINTENDENT OF THE STREET-CLEANING DIVISION.

923 TREMONT BUILDING, BOSTON, February 1, 1898.

MR. BENJAMIN W. Wells, Superintendent of Streets:

Dear Sir: I have the honor to submit herewith the annual report of the Street-Cleaning Division of the Street Department for the year ending January 31, 1898.

The following table will show that never in the history of the Street-Cleaning Division have the streets of Boston been cleaned at a more economical figure than during the past year, despite the growth of the city, and the added burdens on the division:

	Exclusive of supervision.	Including supervision.
1891 (9 months)	\$16 94	\$18 94
1892	16 77	18 97
1893	13 99	16 77
1894	12 57	15 61
1895 (old districts)	16 08	19 49
1895 (new districts)	11 80	$14 \ 40$
1896	12 34	14 93
1897	10 98	13 30

CHARACTER OF THE CITY PAVEMENT.

Macadam, in a much-travelled street, costs in the matter of cleaning, out of all proportion to its merits as a road surface.

Asphalt, which may not have other merits as a street surface, affords the street-cleaner his best opportunities. Granite block pavement occupies perhaps an intermediate place from a street-cleaner's point of view, but the modern block pavement, with the joints filled with pitch and pebble, is most satisfactory in point of cleanliness, as has been clearly demonstrated in the city proper; since its adoption in 1891 in the business district, where the most débris accumulates, and where the work is done every night, the cost per mile is the lowest in the city.

ADVANTAGES OF THE MODERN PAVEMENT.

One somewhat obvious reason for this lies in the evenness of the surface on the modern pavement, a prime factor in any attempt to clean the street. Another reason not so obvious, is — I am convinced—the lessened forcing up between the interstices of the pavement of dirt from below. This would not seem to be a serious matter, till one tried to keep the surface clean, and then a constant supply of soil would be found by the sweeper, which can come from no other source. Excessive dust in street-sweeping is a serious matter to storekeepers, and is doubtless important from a sanitary point of view, while watering the street brings about conditions that are found when the weather is wet. These observations are offered, as showing how small and special considerations will materially affect the cost of the work.

DUMPING FACILITIES.

A more serious question, from an administrative point of view, and one peculiar to Boston, is the lack of dumping facilities. We have only one dumping-wharf at our disposal, and few other

means of disposing of sweepings.

It is clearly a waste of effort in a city like Boston, with a large water front, to haul street-sweepings a mile to the dumping-ground. The remedy is not, perhaps, simple, but the addition to our present facilities of one dumping-wharf at the North End would materially improve our position. This change is made all the more necessary at the present time, from the early probability of losing the Cambridge lowlands as a dumping-ground, where the sweepings from the West and North Ends are now taken.

STREET-SWEEPING METHODS.

The sweeping-machines, that have figured so long as a part of the city's street-cleaning outfit, do a certain kind of work on certain kinds of street surfaces very well, but the most efficient street-cleaning under all conditions is beyond them. chines sweep an uneven pavement very imperfectly, and are well nigh useless in dealing with mud. A minor grievance, controlled to a great extent by the watering cart, is the cloud of dust raised by the machines. Dampening the streets does not overcome this trouble entirely, and in the summer, where upper windows of buildings or dwellings may be open, deposits of dust are serious matters to the merchant and housekeeper, even where the dust can only find ingress to buildings through the open spaces of doors and windows. The best results are practically certain with hand-sweeping, and, with the growing demand of the public for clean streets, and the modern insistence on cleanliness as a sanitary measure, hand-sweeping must come in time. My experience with hand-sweeping — and we have already a great deal of it in connection with the push-cart patrol system —

confirms me in the belief that it raises less dust and is more A great advantage in hand-sweeping, which must be necessarily done by assigning sweepers to particular sections of the street is, that a man is on the ground all day, and serves

many of the purposes of a street-cleaning patrol.

The block system, as it is called, or that of assigning one man to a certain area of a street or streets, has been found to work the best. The man is directly responsible for the condition of the block, acquires a familiarity with the ground and the best means of doing the work, adapting himself to the local conditions; and generally the block system operates to bring the streets under a more minute and constant treatment. I am still of the belief, as expressed in previous reports, that a better discipline and morale of the force would be secured by uniforming

the push-cart sweepers.

The clean streets found in European cities are due to the labor of many more persons than are ever seen in this country engaged in this work. Men, women and even children are bired, often at very small wages, and then the expense is much greater than the average American is ready to pay for sweeping the streets. American public opinion would not tolerate much that is a considerable factor in European street cleaning — as, for example, the employment of women and children - but is demanding a higher scale of street cleanliness each succeeding year and will unquestionably become reconciled to the expense of the best It is intended to make whatever changes are made in the methods of the division, in line with the above observations, so far as will be permitted by the exigencies of the work and the appropriation.

Some Uncalled-for Work.

A matter that appears to me worthy of careful consideration is that of taking away from this division the clearing of sidewalks of snow around public grounds and public buildings. This latter work, especially, comes at a time when the resources of the division are strained to the utmost in attending to the imperative needs of traffic in the removal of snow. It is not street cleaning, nor calls necessarily for a class of labor that might be supposed to constitute the staff of a street-cleaning department.

CITY ORDINANCES.

Respecting litter on the streets, the city ordinances embody complete and adequate legislation on the subject, but their enforcement has been so lax that no good results have been attained. It would not, perhaps, be fair to say there was no improvement in the public carefulness about littering the streets. There is a slow movement for the better, evident in the statistics of the department, but public sentiment does not appear to countenance prosecutions on a severe scale as yet, and until they do, the department and the police will have doubtless to wait. Most of the fine street-cleaning in European cities is due to the rigid enforcement of ordinances, no more exacting than the code obtaining in this city, and public opinion there, having seen the advantages of a clean street, sustains the public prosecutor in his work.

I would not feel that this report was complete without expressing my appreciation of the faithfulness of the foremen, subforemen and workmen who have ably and willingly seconded my efforts in the department.

Respectfully submitted,

Joshua Atwood, 3d,

Deputy Superintendent.

APPENDIX G.

REPORT OF THE DEPUTY SUPERINTENDENT OF THE STREET WATERING DIVISION.

440 AND 441 TREMONT BUILDING, Boston, February 1, 1898.

MR. BENJ. W. Wells, Superintendent of Streets:

Dear Sir: I herewith respectfully submit the annual report of the expenditures, income and operations of the Street Watering

Division for the financial year ending January 31, 1898.

The open character of our winters was made disagreeably manifest during the past season. In January the dust became so unbearable for a time that on January 15 and 16 an effort was made to use the watering earts, but had to be discontinued, owing to the low temperature. There does not appear to be any way of overcoming the dust nuisance during cold, open weather, and attention is called to the matter for the purpose of assuring our citizens that the division appreciates this grievance; that it has tried to give relief, but experiments have resulted in worse conditions,—danger to horse travel.

The season was noted for unusual fall weather. In 1896 the carts were employed seventeen days during September and October, while in 1897, during these months, they worked thirty-five days. The slight increase in expense over the previous year

is due to the dry weather in these two months.

The amount of work done, and the character of the service rendered were about the same as in 1896. The smallness of the appropriation prevented the increase in the force of carts as urged in the last report, but during the warm weather two carts were added in West Roxbury, one cart in Roxbury, and one cart in the Back Bay in answer to the imperative needs of those sections.

In our last report attention was directed to the gradual substitution of salt water for fresh water, and the matter urges itself again because of the fact that we were obliged to pay for the water used last year and the year before. As salt-water mains are about to be constructed for fire purposes I would strongly advise that some consideration be given to the iruse for street-watering purposes. The cost of water for 1896 was \$35,200 and for 1897, \$41,730.40, making a total of \$76,930.40. A proportion of this expense could be saved by the use of salt water.

With your approval a letter containing the following questions was sent to the mayors of the fifty largest cities of this country

with a view of securing information of the methods pursued in other cities, and for the benefit derived from a comparison with

the work accomplished by this division:

"1. How is the cost of street-watering borne in your city—by assessment on the estates benefited, or from the general tax levy? If by assessment, is the service compulsory upon the abutter?

- "2. How is your work done? Do you hire the carts and do the watering under the supervision of the city, or is it done by contract?
- "3. How much, if any, street-watering is done by the street railway companies free of cost to the city? If the street railway companies do not operate electric watering cars, do they contribute anything to the expense of watering on streets through which they run their ears?"

In many of the cities heard from very little is attempted in the line of street-watering, and the voluntary subscription method, similar to the manner in which our paved streets have been watered, obtains in a great number of them, but it is generally unsatisfactory. Some are doing the watering by the assessment plan, and in a number the street railway companies are obliged to contribute to the expense of watering or render some actual watering service.

No city in the country does as much street-watering as the city of Boston, and there is every reason, from comparison, for satisfaction at the results the division has accomplished in this line of

the public service.

In my last annual report I recommended that the division undertake the watering of paved streets, and I wish to again press the matter. This service can be rendered better by the city than under the present arrangements of the subscription method.

I wish also to request that the effort to have the Boston Elevated Railway Company contribute something to the watering

of its tracks be continued.

The following sums have been expended for street-watering during the past seven (7) years:

1891			\$104,263 62	1895			\$76,424	70
	•	•			•	•	,	
1892		•	94,507 80	1896	•	•	71,211	81
1893			99,430 16	1897	•		78,736	72
1894			87,169 08					

Note. — During the year 1897 the sum of \$76,930.40 was expended for the water used in 1896 and 1897. This expense was not paid in previous years, and for the purpose of comparison it has been omitted from the expenditures of 1897 given above.

The income during the last year was \$482.10.

Respectfully submitted,

THOMAS J. FINNERAN,

Deputy Superintendent Street Watering Division.

				THE PERSON NAMED IN COLUMN

The division rendered service in front of 127 school-houses, and the bill for the same is \$3,466.54, and is unpaid by the School Committee.

The Fire Department, requiring special service in front of the engine-houses, notified this division that the department would do its own watering, and, therefore, no charge has been entered against it for watering.

Summary of Day Work paid for by the City.

No.	DISTRICT.	No. Carts.	No. Miles Covered.	Average per Cart.
1	South Boston	9 .	23.05	2 56
$2 \dots$	East Boston	8	21.63	2.70
3		7	15.00	2 14
4	Brighton	13	32.65	2.51
5	West Roxbury	20	61.76	3.08
$6\dots$	Dorchester	19	63.31	3.31
7	Roxbury	20	54.19	2.70
8	Back Bay	11	15.93	1.45
9	Beacon Hill	2	4.25	2.12
10	South End	7	14.36	2.05
	Totals	116	306.13	2.64

The above summary shows that 116 carts watered 306.13 miles of macadam streets this year. This is an increase of four in the number of carts, and an increase of about three-quarters of a mile in streets watered. The cost of this watering, exclusive of supervision and water, was \$62,791.75 against \$56,333.25 the year previous. The additional expense is attributable to the unusual weather conditions of the fall months referred to in the beginning of the report.

The surface watered will be materially increased during the coming season by the acquisition of Blue Hill, Huntington and Commonwealth-avenue boulevards, which are now complete for

travel.

Work done by Contractors at the Expense of the Abutters.

Districts.	Contractors.	Carts.	Miles.
City Proper	Daniel Clark	4	4.45
City Proper	Potter Bros	5	8.75
City Proper	Proctor Bros. & Co.	5	7.25
City Proper	O. Nute & Son	1	2.73
East Boston	J. J. Fitzpatrick	1	2.00
Charlestown	W. H. Quigley	1	2.00
Roxbury and South Boston	A. A. Hall & Co	3	7.78
Roxbury	Gilligan Bros	1	1.25
Totals		21	36.21

The above table shows the work done by contractors for the abutters on what is called the subscription plan. The work is exactly the same as the amount rendered the year previous. Whether the watering is done rests with the abutter, and it can be readily appreciated that many elect to go without water when it is understood that there are 93.17 miles of streets, paved in one way or another, and but 36.21 miles of them are watered. The fact that the city takes care of the macadam streets may have been the reason why many declined to provide for the watering of the paved streets on which they happened to live; but it is certain that the subscription plan is unsatisfactory for the greater reason that some abutters have paid for the service, while their neighbors, declining, have had a benefit at their expense. The experience of other cities is in the same direction.

Work done by the Contractors Free of Cost to the City.

NAME.	Carts.	Miles.
Daniel Clark	$\frac{1}{2}$	0.86
Potter Bros	$\frac{8}{4}$	1.12

NOTE — An increase of 126 stand-pipes since 1891.

The division is indebted to Mr. J. W. Smith, the Local Forecast Official, for daily weather reports.

Our acknowledgments are also due to the Water Department for its assistance in the repair of stand-pipes.

APPENDIX H.

CITY OF BOSTON, ENGINEERING DEPARTMENT, 50 CITY HALL, January 30, 1898.

MR. BENJAMIN W. WELLS, Superintendent of Streets:

Sir: I herewith submit the following report of the work done under my direction for the Street Department during the year 1897:

The work done for the Street Department covers the same ground as in previous years, namely, the supervision of the construction of assessment streets, boulevards and street paving.

The repairs on the asphalt pavements upon which the maintenance guaranty has expired have been supervised in accordance with your directions, and a table is annexed giving repairs and cost thereof in detail; a table has also been prepared showing the details of all asphalt pavement in the city and a copy is enclosed.

On Blue Hill avenue, the work of construction has been completed to Walk Hill street; from that point to Mattapan, the construction awaits the decision of the courts as to the method of abolishing the grade crossing on the New England Railroad.

On Columbus-avenue extension, the section from West Walnut Park to Ritchie street has been built during the year. The work of constructing the new Stony brook channel has delayed the completion of the remainder of the street, but it is expected that the entire avenue will be completed in 1898.

On Commonwealth avenue, a certain amount of work was done near Chestnut Hill avenue, late in the season.

Columbia road was laid out during the year, and work promptly commenced upon it. The work done consists of a large amount of earth and rock excavation, between Blue Hill avenue and the New England Railroad.

The table showing lengths and areas of paving on accepted

streets has been brought up to February 1, 1898.

Street paving has been supervised in all cases where requested. All paving laid on the before-mentioned avenues is included in the quantities given. All granite paving laid on concrete base has been laid with pitch and pebble joints.

Block stone pavement on a concrete base, laid with pitch and

pebble joints, 20,287 square yards.

Block stone pavement on a gravel base, laid with pitch and pebble joints, 17,234 square yards.

Block stone pavement on a gravel base, laid with gravel joints, 67,625 square yards, not including gutter paving.

Trinidad sheet asphalt, with a binder course of asphaltic cement concrete, on an American cement concrete base, 9,715.1 square yards, at an average cost of about \$3 per square yard.

Sicilian rock asphalt on an American cement concrete base or a Portland cement concrete base, 10,032.8 square yards, at an average cost of about \$3 per square yard where on American cement concrete, and about \$3.12\frac{1}{2}\$ per square yard where on Portland cement concrete.

Seyssel rock asphalt, on an American cement concrete base or a Portland cement concrete base, 1,801 square yards, at a cost of \$3 per square yard.

Asphaltina, on an American Portland cement concrete base,

1,639.5 square yards, at a cost of \$2.75 per square yard.

The costs per square yard given above do not include the preparation of the roadbed.

Edgestone set, 88,649 linear feet; gutter paving laid, 33,615

square yards; brick sidewalks laid, 42,962 square yards.

Crushed stone sidewalks constructed, 35,247 square yards;

flagging crosswalks laid, 7,777 square yards.

All asphalt paving is laid with a maintenance guaranty for five years.

A List of Streets Paved with Sheet Asphalt, and having a Maintenance Guaranty February 1, 1898.

Prices paid for surfacing patches, \$2 per yard.

Prices paid for entire removal, \$2.50 per yard.

In addition to the above, \$92.60 was paid for sundry small patches on seven asphalt streets, the guaranty upon which expired in 1897; on thirteen similar streets no patching was done.

Albany street, Stoughton street to East Concord street, was paved with 2½ inches of Sicilian rock asphalt, on a 6-inch Portland cement concrete base, by the Boston Asphalt Company. The old pavement was removed, roadway excavated, granite edgestones reset, block paving relaid, brick sidewalks and flagging crosswalks relaid by H. Gore & Co. The former pavement was granite blocks on gravel bed. Three square granite catchbasin frames were removed and cast-iron D frames substituted.

Avery street, Washington street to Mason street, was paved with $2\frac{1}{2}$ inches of Sicilian rock asphalt, on a 6-inch Portland cement concrete base, by the Boston Asphalt Company. old pavement was removed, roadway excavated, edgestones reset, brick sidewalks and flagging crosswalks relaid by H. Gore & Co. The former pavement was granite blocks on gravel From Washington street across Haymarket place the gutters (10 inches in width) were paved with granite blocks on a concrete base.

Boylston street, east of Berkelev street to west of Clarendon street, including tracks of West End Street Railway Company, was paved with 2 inches of Trinidad lake asphalt, with 1½ inches bituminous concrete binder, on a 6-inch American cement concrete base by the Barber Asphalt Paving Company. pavement was removed, roadway excavated, edgestones reset, brick sidewalks and flagging crosswalks relaid by T. M. Gill. The West End Street Railway Company, by agreement, paid for the portion within its tracks. Former pavement was macadam with granite block gutters.

Bradford street, Waltham street to Shawmut avenue, was paved with 2½ inches Sicilian rock asphalt, on a 6-inch American cement concrete base by the Boston Asphalt Company. The roadway was sub-graded, edgestones reset, brick sidewalks and flagging crosswalks relaid by the Street Department. payement was macadam, with cobble-stone gutters. Four square granite catch-basin frames were removed and cast-iron D frames

Bulfinch street, Bowdoin square to Bulfinch place, was paved with large granite blocks on a 6-inch American cement concrete base, with pitch and pebble joints. The old pavement was barred out and loaded, roadway excavated and loaded, and concrete base laid by the Metropolitan Construction Company. paving was laid, edgestones reset, brick sidewalks and flagging crosswalks relaid by H. Gore & Co. The Street Department furnished teams for carting away old blocks and surplus Former pavement was granite blocks on gravel bed. material.

Cabot street, Vernon street to Linden Park street, was paved with 2 inches of Trinidad lake asphalt, with $1\frac{1}{2}$ inches of bituminous concrete binder on a 6-inch American cement concrete base by the Barber Asphalt Paving Company. The roadway was sub-graded by the Paving Division. Edgestones were reset, brick sidewalks and flagging crosswalks relaid by Barnes & Ruffin. Former pavement was macadam with cobble-stone gutters.

new catch-basin was built and one square granite catch-basin frame removed and a cast-iron D frame substituted.

Charles street, Cambridge street to Leverett street, including the tracks of the West End Street Railway Company, was paved with standard granite block, on a gravel bed with pitch and pebble joints, by Dennis J. Kiley. The old pavement was removed and roadway excavated by the Paving Division Edgestones were reset, brick sidewalk and flagging crosswalks relaid by Dennis J. Kiley. The West End Street Railway Company, by agreement, paid for the portion between its tracks. Former pavement was old granite blocks on gravel bed. One new catchbasin was built and five square granite catch-basin frames were removed and cast-iron D frames substituted. Owing to sewer construction the easterly roadway between Allen and Poplar streets was not paved.

Cobb street, Shawmut avenue to Washington street, was paved with 2½ inches of Sicilian rock asphalt on a 6-inch American cement concrete base by the Boston Asphalt Company. The roadway was excavated, edgestones reset, brick sidewalks and flagging crosswalks relaid by the Paving Division. Former pavement was macadam with block gutters. One new catch-basin was built and one square granite catch-basin frame removed and

a cast-iron D frame substituted.

Congress street, State street to Exchange place, including the tracks of the West End Street Railway Company, was paved with Philadelphia special blocks on a 6-inch American cement concrete base with pitch joints. The old pavement was barred out and loaded, roadway excavated and loaded, concrete base laid by the Metropolitan Construction Company. The pavement was laid, edgestones reset, brick sidewalks and flagging crosswalks relaid by H. Gore & Co. The West End Street Railway Company, by agreement, paid for the portion within its tracks. Former pavement was old "Boston" blocks on gravel bed. One square granite catch-basin frame was removed and a cast-iron D frame substituted.

Cooper street, Endicott street to Charlestown street, was paved with 2 inches of Trinidad lake asphalt, with bituminous concrete binder, on existing concrete base, by the Barber Asphalt Paving Company. Former pavement was Trinidad lake asphalt,

originally laid in 1887.

Covington street, between Thomas park and East Eighth street, is about 264 feet long and 43 feet wide, with a difference in level between the above-named limits of 62.8 feet; from East Eighth street it rises at the rate of about 17 feet per 100 for 160 feet; from this point, seven flights of artificial stone steps and platforms, with iron fences and hand rails, 104 feet long and rising 37.8 feet, were built by the W. A. Murtfeldt Company, at a cost of \$4,085. These steps were built in the centre of the street, 12 feet wide, with side flights and platforms (three in number at present), giving access to abutting property. The above price includes the cost of all necessary excavation and

grading; also surfacing, loaming and seeding the slopes between the steps and abutting property. A retaining wall was built along the estate of William S. Milligan by T. F. Broderick, at a cost of \$1,087.35. The portion of the street, 160 feet from East Eighth street, is to be constructed with a macadam roadway, granite block gutters, granite edgestones and brick sidewalks. The work of constructing this portion of the street was not

begun at the end of the working season.

Dudley street, Brook avenue to Upham's Corner, including the tracks of the West End Street Railway Company, was paved with standard granite blocks on gravel bed. The roadway was sub-graded by the Paving Division. Between Brook avenue and the New England Railroad crossing the roadway was paved, edgestones reset, brick sidewalks and flagging crosswalks relaid by T. M. Gill; between the New England Railroad crossing and Upham's Corner, similar work was done by Doherty & Connors. Former pavement was macadam, with block and cobble-stone gutters. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

East Broadway, in front of the Lincoln School, including the tracks of the West End Street Railway Company, was paved with $2\frac{1}{2}$ inches of Sicilian rock asphalt, on a 6-inch American cement concrete base, by the Boston Asphalt Company. The old pavement was barred out and loaded, roadway excavated and loaded, edgestones reset and brick sidewalk relaid by H. Gore & Co. The Street Department furnished teams for carting away old blocks and surplus excavation. Former pavement was granite blocks on a gravel bed. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

Exeter place, Chauncy street to Harrison avenue, was paved with $2\frac{1}{2}$ inches of Sicilian rock asphalt, on a 6-inch American cement concrete base, by the Boston Asphalt Company. The roadway was sub-graded, edgestones reset, brick sidewalks and flagging crosswalks relaid by H. Gore & Co. Former payement

was macadam, with cobble-stone gutters.

La Grange street, Tremont street to Police Station No. 4, was paved with 2 inches of Trinidad lake asphalt, with $1\frac{1}{2}$ inches bituminous concrete binder, on a 6-inch American cement concrete base, by the Barber Asphalt Paving Company. The old pavement was removed, roadway excavated, edgestones reset, brick sidewalks relaid by the Paving Division. Former

pavement was granite blocks on a gravel bed.

Lincoln place, Worcester street to Springfield street, was paved with 2 inches of Trinidad lake asphalt, with $1\frac{1}{2}$ inches bituminous concrete binder, on a 6-inch American cement concrete base, by the Barber Asphalt Paving Company. The roadway was sub-graded, edgestones reset, brick sidewalks and flagging crosswalks relaid by the Paving Division. Former pavement was macadam, with block gutters. Three new catch-basins were built, one on each of the following streets: Worcester, Springfield and Stevens.

Main street, Miller street across Mead street, including the tracks of the West End Street Railway Company, was paved with standard granite blocks, on a gravel bed, by John Turner & Co. The old pavement was removed, roadway excavated, edge-stones reset, brick sidewalks and flagging crosswalks relaid by John Turner & Co. Former pavement was old granite blocks on gravel bed. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

Massachusetts avenue (easterly side), from Tremont street to Columbus avenue, was paved with 2 inches of so-called "asphaltina" (a patented coal tar production), with 1½ inches coal tar concrete binder, on a 6-inch American Portland (Saylor) cement concrete base, by the Boston Paving Company. The old pavement was removed and roadway excavated by the Paving Division. Former pavement was Hastings asphalt blocks on a gravel bed, laid in 1891.

Mayo street, Castle street to Cobb street, was paved with $2\frac{1}{2}$ inches of Sieilian rock asphalt, on a 6-inch American cement concrete base, by the Boston Asphalt Company. The roadway was excavated, edgestones reset, brick sidewalks and flagging crosswalks relaid by the Paving Division. Former pavement

was macadam, with block stone gutters.

North street, Merchants' row to Union street, was paved with standard granite blocks, on a 6-inch American cement concrete base, with pitch and pebble joints. The old pavement was barred out and loaded, roadway excavated and loaded, concrete base laid by the Metropolitan Construction Company. The roadway was paved, edgestones reset, brick sidewalks and flagging crosswalks laid by H. Gore & Co. The Street Department furnished teams for carting away the old paving blocks and surplus excavation. Former pavement was old granite blocks on a gravel bed.

North Margin street, Thacher street towards Endicott street, was paved with $2\frac{1}{2}$ inches of Sicilian rock asphalt on a 6-inch Portland cement concrete base, by the Boston Asphalt Company. The old pavement was barred out and loaded, roadway excavated and loaded, edgestones set, brick sidewalks and flagging crosswalks laid by P. H. Bradley & Co. The Street Department furnished teams for carting away the old blocks and surplus excavation. Former pavement was old granite blocks

on a gravel bed.

Paul street, Tremont street to Emerald street, was paved with $2\frac{1}{2}$ inches of Seyssel natural rock asphalt on a 6-inch American cement concrete base, by Jones & Meehan. The old pavement was barred out and loaded, roadway excavated and loaded, edgestones reset, brick sidewalk and flagging crosswalk laid by Jones & Meehan. Former pavement was macadam and paving bricks. The Street Department furnished teams for carting away old pavement and surplus excavation.

Pelham street, Washington street to Shawmut avenue, was paved with $2\frac{1}{2}$ inches of Seyssel natural rock asphalt on a 6-inch

American cement concrete base by Jones & Meehan. The roadway was excavated and loaded, edgestones reset, brick sidewalks and flagging crosswalks laid by Jones & Meehan. Former pavement was macadam with block gutters. The Street Department furnished teams for carting away surplus excavation.

Rutherford avenue, near Devens street, in front of Episcopal church, was paved with 2 inches Trinidad lake asphalt, with 1½ inches bituminous concrete binder on a 6-inch American cement concrete base by the Barber Asphalt Paving Company. The old pavement was removed and roadway excavated by the Paving Division. Edgestones were reset, brick sidewalks and flagging crosswalks laid by P. Brennan & Co. Former pavement, granite

blocks on gravel bed.

State street, Washington street to Commercial street, including tracks of the West End Street Railway Company, was paved with standard granite blocks on a 6-inch American cement concrete base with pitch and pebble joints. The old pavement was removed and roadway excavated by the Paving Division; concrete base laid by the Metropolitan Construction Company. Paving was laid, edgestones reset, brick sidewalks and flagging crosswalks laid by H. Gore & Co. Former pavement was old granite blocks on gravel bed. One new catch-basin was built and five square granite catch-basin frames were removed and cast-iron D frames substituted. Most of the old brick sidewalks were replaced by granolithic, laid by Simpson Bros. Corporation. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

Tremont street, Columbus avenue to Ruggles street, including tracks of the West End Street Railway Company, was paved with large granite blocks on a gravel bed. The old pavement was removed and roadway excavated by the Paving Division. Roadway was paved, edgestones reset, brick sidewalks and flagging crosswalks relaid by Jones & Meehan. The northerly roadway, between Columbus avenue and Prentiss street, was repaired in 1896. The West End Street Railway Company, by agreement, paid for the portion within its tracks. Former pavement was old granite blocks on a gravel bed. Two new catch-basins were

built.

Tufts, Vine, Moulton and Corey streets, around St. Catherine's Catholic Church, were paved with 2 inches of Trinidad lake asphalt, with $1\frac{1}{2}$ inches bituminous concrete binder, on a 6-inch American cement concrete base, by the Barber Asphalt Paving Company. The old pavement was removed and roadway excavated by the Paving Division. Edgestones were reset, brick sidewalks and flagging crosswalks relaid by P. Brennan & Co. Former pavement was macadam with block gutters. One new catch-basin was built, one square granite catch-basin frame was removed and a cast-iron D frame substituted.

Unity street, Charter street to Tileston street, was paved with 2 inches Trinidad lake asphalt, with $1\frac{1}{2}$ inches bituminous concrete binder, on a 6-inch American cement concrete base, by

the Barber Asphalt Paving Company. The old pavement was removed and roadway excavated by the Paving Division. Edge-stones were reset, brick sidewalks and flagging crosswalks were relaid by Charles L. Ward. Former pavement was cobble-stones on gravel bed. Two square granite catch-basin frames were removed and cast-iron D frames substituted.

Washington street, Kneeland street to Dover street, including tracks of West End Street Railway Company, was paved with standard granite blocks on a 6-inch American cement concrete base, with pitch and pebble joints. The old pavement was removed and roadway excavated by the Paving Division. Between Kneeland street and B. and A. R.R. bridge concrete base and paving were laid, edgestones reset, brick sidewalks and flagging crosswalks laid by William Higgins. Boston and Albany Railroad bridge and Dover street, similar work was done by Jones & Meehan. Former pavement was granite blocks on gravel bed. Five new catch-basins were built, seven square granite catch-basin frames were removed and castiron D frames substituted. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

Washington street, Dover street to Waltham street, including tracks of the West End Street Railway Company, was paved with standard granite blocks, partly on concrete base and partly on gravel bed, all with pitch and pebble joints. The old pavement was removed and roadway excavated by the Paving Division. Concrete base and paving were laid, edgestones reset, brick sidewalks and flagging crosswalks relaid by Jones & Meehan. Former pavement was granite blocks on gravel bed. The West End Street Railway Company, by agreement, paid for the

portion within its tracks.

Waterford street, Washington street to Shawmut avenue, was paved with $2\frac{1}{2}$ inches Seyssel natural rock asphalt on a 6-inch Portland cement concrete base by Jones & Meehan. The old pavement was barred out and loaded, roadway excavated and loaded, edgestones reset, brick sidewalks and flagging crosswalks relaid by Jones & Meehan. The Street Department furnished teams for carting away old blocks and surplus excavation.

Former pavement was granite blocks on gravel bed.

West Broadway, New England Railroad bridge to E street, including tracks of the West End Street Railway Company, was paved with large granite blocks on gravel bed. The old pavement was removed and roadway excavated by the Paving Division. A strip of Sicilian rock asphalt, 4 feet wide, was laid in either gutter on concrete base, for the purpose of providing a bicycle way. Roadway paving and asphalt was laid, edgestones reset, brick sidewalks and flagging crosswalks relaid by H. Gore & Co. Former pavement was granite blocks on gravel bed. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

West Broadway, 113 feet west of F street to 308 feet east of F street, was paved with $2\frac{1}{2}$ inches of Sicilian rock asphalt on a

6-inch Portland cement concrete base by the Boston Asphalt Company. Granite block paving on gravel bed, with pitch joints, was laid in tracks of the West End Street Railway Company, and 18 inches outside, by H. Gore & Co. The old pavement was barred out and loaded, roadway excavated and loaded, edgestones reset, brick sidewalks and flagging crosswalks were relaid by H. Gore & Co. Former pavement was granite blocks on gravel bed. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

Wiget street, Salem street to North Margin street, was paved with 2 inches Trinidad lake asphalt, with $1\frac{1}{2}$ inches bituminous concrete binder, on a 6-inch American cement concrete base, by the Barber Asphalt Paving Company. The old pavement was removed, roadway excavated, edgestones reset, brick sidewalks and flagging crosswalks relaid by the Paving Division. Former pavement was granite blocks 1 foot square. One square granite catch-basin frame was removed and a cast-iron D frame

substituted.

Winthrop square, Boston proper, and the intersection of Devonshire and Franklin streets, including tracks of West End Street Railway Company, were paved with Philadelphia, special cut, granite blocks, on a 6-inch American cement concrete base. The old pavement was barred out and loaded, roadway excavated and loaded, concrete base laid by the Metropolitan Construction Company. The Street Department furnished teams for carting away old paving blocks and surplus excavation. Granite blocks and flagging crosswalks were laid by H. Gore & Co. The West End Street Railway Company, by agreement, paid for the portion within its tracks.

NEW STREETS.

The following streets were constructed under chapter 323 of the Acts of the Legislature of Massachusetts of 1891, and Acts in ameudment thereof or in addition thereto:

Athelwold street, School street to Kilton street, is about 1,028 feet long. The contract for constructing the surface of this street was awarded to Collins & Ham. Work under this contract was begun July 19, 1897, and completed September 18, 1897, at a total cost of \$2,972.63. It is a 6-inch macadam road with crushed stone sidewalks. Crushed stone, gutter blocks, and straight edgestones were furnished by the city and hauled to the site of the work by the contractor. Circular edgestone and flagging for crosswalks were furnished by the contractor.

Bernard street, Harvard street to Talbot avenue, is about 1,454 feet long. The contract for constructing the surface of this street was awarded to John A. Whittemore's Sons. Work

under this contract has not yet begun.

Bloomfield street, Geneva avenue to Greenbrier street, is about 1,561 feet long. The contract for constructing the surface of this street was awarded to Collins & Ham. Work under this

contract was begun September 8, 1897, and completed October 26, 1897, at a cost of \$1,756.95. It is a 6-inch macadam road, with crushed stone sidewalks. Crushed stone and gutter blocks were furnished by the city and hauled to the site of the work by the contractor. Existing edgestones were reset and flagging for

crosswalks were furnished and laid by the contractor.

Boylston street. (See Street Department Report for 1896, page 467.) Boylston road to Brookline avenue is about 2,070 feet long. A contract for constructing the surface of this street was awarded to Neil McBride. Work was begun October 20, 1896, and completed June 18, 1897, at a cost of \$12,846.47. This street has a 6-inch macadam roadway, with gravel sidewalks. Crushed stone and edgestones were furnished by the city, and hauled to the site of the work by the contractor. Gutter blocks were furnished and delivered on the street by the city. Flagging for crosswalks was furnished by the contractor.

Chamberlain street, Harvard street to Algonquin street, is about 475 feet long. A contract for constructing the surface of this street was awarded to Collins & Ham. Work was begun August 2, 1897, and completed October 2, 1897, at a cost of \$1,397.29. This street has a 6-inch macadam roadway, with crushed stone sidewalks. Crushed stone, gutter blocks and edgestones were furnished by the city, and hauled to the site of the work by the contractors. Flagging for crosswalks was fur-

nished by the contractors.

Ellet street, Adams street to Dorchester avenue, is about 444 feet long. A contract for constructing the surface of this street was awarded to H. Gore & Co. Work was begun July 31, 1897, and completed September 7, 1897, at a cost of \$1,139.21. This street has a 6-inch macadam roadway, with crushed stone sidewalks. Crushed stone, gutter blocks and edgestones were furnished by the city, and hauled to the site of the work by the contractors. Flagging for crosswalks was furnished by the contractors.

Fairmount street, Washington street to Morton street, is about 2,672 feet long. A contract for constructing the surface of this street was awarded to James McGovern. Work was begun November 16, 1897, but, with the exception of a small

amount of filling and grading, nothing has been done.

Fullerton street, Brookline avenue to Fairhaven street, is about 467 feet long. A contract for constructing the surface of this street was awarded to Philip Doherty. Work was begun July 28, 1897, and completed September 25, 1897, at a cost of \$2,333.74. This street has a 6-inch macadam roadway, with crushed stone sidewalks. Crushed stone, straight edgestones and gutter blocks were furnished by the city, and hauled to the site of the work by the contractor. Circular edgestones and flagging for crosswalks were furnished by the contractor.

Gaylord street, Washington street to Chamberlain street, is about 451 feet long. A contract for constructing the surface of this street was awarded to Doherty & Connors. Work was

begun July 31, 1897, and completed September 7, 1897, at a cost of \$942.01. This street has a 6-inch macadam roadway, with crushed stone sidewalks. Crushed stone, edgestones and gutter blocks were furnished by the city, and hauled to the site of the work by the contractors. Flagging for crosswalks was

furnished by the contractors.

Geneva avenue, Westville street to Dorchester avenue, is about 2,137 feet long. A contract for constructing the surface of this street was awarded to Finneran & O'Hearn. Work was begun November 13, 1896, and completed August 9, 1897, at a cost of \$6,596.18. This street has a 6-inch macadam roadway, with gravel sidewalks. Crushed stone and edgestones were furnished by the city, and hauled to the site of the work by the contractors. Gutter blocks were furnished and delivered on the street by the city. Flagging for crosswalks was furnished by the contractors.

Greenbrier street, Bloomfield street to Park street, is about 842 feet long. A contract for constructing the surface of this street was awarded to H. Gore & Co. Work was begun September 14, 1897, and completed November 19, 1897, at a cost of \$2,181.60. This street has a 6-inch macadam roadway, with crushed stone sidewalks. Crushed stone, gutter blocks and edgestones were furnished by the city, and hauled to the site of the work by the contractors. Flagging for crosswalks was furnished by the contractors.

Ipswich street, from Boylston road to Boylston street, is about 2,366 feet long. The Boston and Albany Railroad Company, as provided in its contract for filling Queensberry street, deposited filling in said Ipswich street, amounting to 35,380 cubic yards, at 51 cents per yard, equal to \$18,043.80. The contract for constructing the surface of this street has not been

let.

Lauriat avenue, Blue Hill avenue to Tucker street, is about 3,160 feet long. A contract for constructing this street was awarded to Doherty & Connors. Work was begun October 5, 1896, and completed June 1, 1897, at a cost of \$9,797.62. This street has a 6-inch macadam roadway, with gravel sidewalks. Crushed stone, gutter blocks and edgestones were furnished by the city, and hauled to the site of the work by the contractors. Flagging for crosswalks was furnished by the contractors.

Norway street, Massachusetts avenue to Parker street, is about 720 feet long. A contract for constructing the surface of this street was awarded to Doherty & Connors. Work was begun August 25, 1897, and completed October 16, 1897, at a cost of \$3,327.05. This street has a 6-inch macadam roadway, with crushed stone sidewalks. Crushed stone, gutter blocks and straight edgestones were furnished by the city, and hauled to the site of the work by the contractors. Circular edgestones and flagging for crosswalks were furnished by the contractors.

Peterborough street, Audubon road to Audubon road, is about 1,833 feet long. A contract for filling this street to

sub-grade was made with Boston and Albany Railroad Company on October 30, 1896, at the rate of 51 cents per cubic yard measured in the cut. Work was begun under this contract December 2, 1896, and completed April 22, 1897. Total amount of filling deposited was 57,073 cubic yards, at 51 cents per yard, equal to \$29,107.23. The contract for constructing the surface of this street has not been let.

Queensberry street, Audubon road to Audubon road, is about 1,738 feet long. A contract for filling this street to sub-grade was made with the Boston and Albany Railroad Company, on September 7, 1897, at the rate of 51 cents per cubic yard measured in the cut. Work was begun under this contract September 23, 1897, and completed January 28, 1898. Total amount of filling 58,222 cubic yards; total cost \$29,693.22. The contract for constructing the surface of this street has not been let.

Ruggles street, Parker street to Back Bay Fens, is about 945 feet long. A contract for constructing the surface of this street was awarded to Doherty & Connors. Work was begun December

2, 1897, and suspended January 6, 1898.

Tonawanda street, Geneva avenue to Greenbrier street, is about 1,700 feet long. A contract for constructing the surface of this street was awarded to Philip Doherty. Work was begun

October 11, 1897, and suspended January 6, 1898.

Turner street, Haviland street to Astor street, is about 732 feet long. A contract for constructing the surface of this street was awarded to Doherty & Connors. Work was begun August 25, 1897, and completed October 16, 1897, at a cost of \$3,714.23. This street has a 6-inch macadam roadway with brick sidewalks. Crushed stone, gutter blocks and straight edgestones were furnished by the city and hauled to the site of the work by the contractors. Bricks for sidewalks were furnished and delivered on the street by the city. Circular edgestones and flagging for crosswalks were furnished by the contractors.

Vancouver street, Huntington avenue to Ruggles street, is about 254 feet long. A contract for constructing the surface of this street was awarded to Doherty & Connors. Work was begun

December 2, 1897, and suspended January 6, 1898.

Wolcott street, Columbia road to Erie street, is about 690 feet long. A contract for constructing the surface of this street was awarded to Collins & Ham. Work was begun July 30, 1897, and completed October 16, 1897, at a cost of \$1,477.11. This street has a 6-inch macadam roadway with crushed stone sidewalks. Crushed stone, gutter blocks and edgestones were furnished by the city and hauled to the site of the work by the contractors. Flagging for crosswalks was furnished by the contractors.

GRADING STREET RAILWAY TRACKS.

The grades for tracks in the following streets have been determined. On streets marked * the surveys were made and levels taken by the companies:

(West End Street Railway.)

Adams street, from Park street to Parkman street.

Beacon street, from Commonwealth avenue to St. Mary's street.

Boylston street, from Tremont street to Washington street.

* Cambridge street, Brighton, from Saunders street to near Dustin street.

Centre street, Roxbury, from Wyman street to Parker street.

Centre street, Roxbury, from Day street to Wyman street. Charles street, from Cambridge street to Leverett street.

Chelsea street, from City square to Adams street.

Church street, from Boylston street to Providence street.

Congress street, from State street across Water street.

Dudley street, from Guild row to Eliot square.

Dudley street, from Brook avenue to Upham's corner.

East Broadway, from I street to K street.

Franklin street, at Devonshire street.

K street, from East Broadway to East Fourth street.

Main street, Charlestown, from Miller street across Mead street.

Massachusetts avenue, from Huntington avenue to Columbus avenue.

Pleasant street, between Tremont street and Shawmut avenue.

Providence street, from Columbus avenue to Church street.

Saratoga street, from Chelsea street to Winthrop Junction.

Shawmut avenue, at Pleasant street.

Staniford street, from Green street to Merrimac street.

State street, from Devonshire to Congress street.

Temple place, at Tremont street.

Tremont street, from Boylston street to Warrenton street.

Tremont street, at Pleasant street.

Tremont street, from Vernon street to Cabot street.

Tremont street, at Roxbury crossing.

Washington street, from Hollis street to Warrenton street.

Washington street, from Boston and Albany Railroad bridge to Waltham street.

* Washington street, from Guild street to Atherton street. West Broadway, from New England Railroad bridge to 450 feet east of F street.

(Lynn and Boston Railroad Company.)

Bennington street, from Saratoga street to Walley street. Walley street, from Bennington street to Washburn avenue.

(West Roxbury and Roslindale Street Railway Company.)

*Grove street, West Roxbury, Washington street to Dedham line.

Total length of single track grades, 15.6 miles.

Surveys and plans were made for work upon the following streets and grades and lines given. The work of construction was

supervised by the Street Department:

Abbotsford street, Crawford street to Harold street, was surfaced with macadam by the Paving Division; granite block gutters, edgestones and flagging crosswalks were laid by John McCourt. Park edgestones were set, enclosing the triangular space between the lines of Abbotsford, Crawford and Harold streets, by J. McCourt. The area between park curb was loamed and grassed. Formerly not built.

Adams street, Park street to Parkman street, including tracks of West End Street Railway Company, was widened and paved with large granite blocks on gravel base, excepting the westerly roadway between Gibson and Park streets. The necessary excavating was done by the Paving Division. Paving blocks were laid, edgestones set and flagging crosswalks laid by

James Dolan. Former surface was macadam.

Audubon circle, southerly side, was surfaced with Telford macadam by the Paving Division. Granite block gutters were laid and edgestones set by A. Ford & Son. Formerly not built.

Beacon street, Tremont to Somerset street, was paved with granite blocks on a gravel bed, with pitch joints. The old paving blocks were barred out, removed and cleaned, paving bed prepared and blocks relaid by H. Gore & Co. This part of the street was paved with large granite blocks on gravel bed, with pitch joints, in 1893, but was in very bad condition, owing to the construction of the Tremont Building and to the fact that the street had to be dug up several times by corporations for the purpose of laying pipes, etc.

Beacon street, Commonwealth avenue to St. Mary's street, was resurfaced with macadam by the Paving Division. West End Street Railway tracks were reset to grade. The necessary excavation was made by the Paving Division. Edgestones were reset, gutters and flagging crosswalks relaid by William Higgins.

Former surface was macadam.

Beacon street, circle (northerly side), at Chestnut Hill avenue, was graded by the Paving Division. Edgestones were set, block gutters and flagging crosswalks laid by G. H. Wentworth & Co.

Belvidere street, Falmonth street towards Boston and Albany Railroad yard. A small amount of work was done, setting edgestones, paving gutters, laying flagging crosswalks and brick sidewalks, by T. M. Gill.

Boylston street (southerly side), Tremont street to Washington street, was repayed with granite blocks on gravel base,

with gravel joints, by J. B. O'Rourke.

Boylston street (southerly side), Tremont street to Park square, was repayed with granite blocks on gravel base, with gravel joints, by T. M. Gill.

Centre street (Roxbury), Parker street to Day street, was resurfaced with macadam by the Paving Division. Edgestones were set, gutters and flagging crosswalks laid by James Dolan. Excavating was done by the Paving Division. Former surface was macadam.

Centre street (West Roxbury), New York, New Haven and Hartford Railroad bridge to Corey street, was resurfaced with macadam by the Paving Division. Edgestones were set, gutters paved and crosswalks laid by James Dolan. The necessary excavating was done by the Paving Division. Former surface was macadam.

Commonwealth avenue (southerly roadway), Allston street, westerly. Granite block gutters were laid by George H. Wentworth & Co.

Commonwealth avenue, between Chestnut Hill avenue and Warren street. Granite block gutters were laid by George H. Wentworth & Co.

Cove street, Kneeland street to Essex street, was widened to 100 feet, and a temporary roadway about forty feet wide was paved with granite blocks on a gravel bed. The blocks in the old street were barred out, the bed was prepared, and necessary excavation done by the Paving Division. Paving was laid, edgestones set, brick sidewalks and flagging crosswalks relaid by T. M. Gill.

Culvert street, Tremont street to Ruggles street, was paved with granite blocks on gravel bed. Paving was laid, edgestones set, brick sidewalks and flagging crosswalks laid by Barnes & Ruffin and A. Ford & Son.

Cunard street, Tremont street to Columbus avenue. Granite block gutters were laid, edgestones set and brick sidewalks laid by Barnes & Ruffin.

Gold street, B street to New England Railroad bridge. Edgestones were set, granite block gutters and brick sidewalks were laid by Wm. H. Glenn.

Haverhill street, north of Causeway street, was repaved with old granite blocks on a gravel bed by D. J. Kiley. The old pavement of cobble stones was removed and bed prepared by the Paving Division.

Lafayette avenue, Endicott street to Prince street, was paved with old granite blocks on a gravel bed by McColgan & Bradley. The old cobble-stone pavement was removed and roadway excavated by the Paving Division. Edgestones were reset, brick sidewalks and flagging crosswalks were relaid by McColgan & Bradley.

Longwood avenue, Huntington avenue to Brookline avenue, was resurfaced with macadam by the Paving Division. Edgestones were set, granite block and cobble-stone gutters and brick sidewalks laid by William Higgins.

Mason street, Tremont street to line of asphalt pavement, was repayed with old blocks on gravel base, with gravel joints, by H. Gore & Co.

Mason street, West street to engine-house, was repaved with large granite blocks on gravel base with pitch and pebble joints,

by T. M. Gill.

Massachusetts avenue, Columbus avenue to Huntington avenue, was resurfaced by the Paving Division. Edgestones were set, granite block gutters, flagging crosswalks and brick sidewalks were relaid by T. M. Gill.

Providence street, Park street to beyond Church street, was repayed with old granite blocks on gravel base with gravel joints by T. M. Gill. Edgestones were reset, flagging cross-

walks and brick sidewalks were relaid by T. M. Gill.

Riverside street, Columbus avenue to Tremont street. Edgestones were set, gutters paved, brick sidewalks and flagging cross-

walks laid by A. Ford & Son and Barnes & Ruffin.

Ruggles street, Tremont street to New York, New Haven and Hartford Railroad location, was paved with granite blocks on gravel base with gravel joints by A. Ford & Son. Edgestones were reset, brick sidewalks and flagging crosswalks laid by A. Ford & Son.

Saratoga street, Wordsworth street to Winthrop Junction,

was filled to established grade by P. J. Attridge.

Sarsfield street, Tremont street to Grinnell street. Edgestones were reset, gutters paved, brick sidewalks and flagging

crosswalks laid by Barnes & Ruffin.

Staniford street, Green street to Merrimac street, was paved with granite blocks on gravel base with gravel joints by D. J. Kiley & Co. Edgestones were reset, brick sidewalks and flagging crosswalks relaid by D. J. Kiley & Co.

Station street, Columbus avenue to Parker street, was paved with granite blocks on gravel base with gravel joints; edgestones were reset, brick sidewalks and flagging crosswalks were laid by

Barnes & Ruffin.

Summer street (widening), Federal street to Atlantic avenue, was paved temporarily with old granite blocks on gravel base with gravel joints; edgestones were set and flagging crosswalks laid by T. M. Gill.

Terry street, Columbus avenue to Tremont street, gutters were

paved by A. Ford & Son.

Tremont street, Culvert street to Sarsfield street, was paved with large granite blocks on gravel base with gravel joints. Edgestones were reset, flagging crosswalks and brick sidewalks

laid by Barnes & Ruffin.

Tufts, Vine, Moulton and Corey streets, around St. Catherine's Catholic Church. Edgestones were reset, flagging crosswalks and brick sidewalks relaid by P. Brennan & Co. Considerable paving was also done to meet the grade of asphalt pavement.

Unity street, Charter street to Tileston street. Edgestones were reset, brick sidewalks and flagging crosswalks relaid by

C. L. Ward.

Walpole street, Columbus avenue to Tremont street. Edgestones were set, gutters paved, brick sidewalks and flagging crosswalks laid by A. Ford & Son.

Water street, Washington street to Devonshire street, was paved with large granite blocks on gravel base with pitch joints

by H. Gore & Co.

Weston street, Tremont street to Hammet street. Gutters were paved, edgestones set, flagging crosswalks and brick side-

walks laid by A. Ford & Son and Barnes & Ruffin.

Western avenue, Market street to Everett street. Gutters were paved, edgestones set, brick sidewalks and crosswalks laid by James Grant, D. J. Kiley and G. H. Wentworth & Co.

MISCELLANEOUS WORK.

Abbottsford street, Harold street and Crawford street. Plan and specification for park curbing.

Plan case, plan and specifications.

Freeport street, plan of retaining wall.

Geneva avenue, plan and specification for cap-stones and fences on culverts.

Lauriat avenue, plan and specification for cap-stones and fences on culverts.

Table showing lengths and areas of pavements on official streets to February 1, 1898.

Tremlett street (Dorchester), plan and specification for park curbing.

Blue Hill avenue, plan and specification for retaining wall

along Franklin park.

Surveys, plans and estimates for improving and paving the following streets have been made:

Albion street, Castle street to Compton street.

Carlton street, West Newton street to Berwick park.

Centre street (Roxbury), Day street to Wyman street.

Chair alley, Cross street to Richmond street. Chelsea street, City square to Adams street.

Church street, Boylston street to Providence street.

Congress street, Exchange place across Water street.

Endicott street, Causeway street to Hanover street.

Fayette street, Ferdinand street to Church street.

Howard street, Bulfinch street to Tremont street.

I street, East Broadway to East Fourth street. K street, East Broadway to East Fourth street.

La Grange street, Tremont street to Washington street.

Private way, Tremont street to Avery street.

Tremont street, Boylston street to Warrenton street.

Tremont street, Weston street to Northfield street.

Warren street (Roxbury), Rockland street to Woodbine street.

West Broadway, E street to Dorchester street.

West Newton street, Columbus avenue to Shawmut avenue.

DUMPING WHARF FOR THE SANITARY DIVISION OF THE STREET DEPARTMENT.

Plans and estimates were prepared for strengthening Fort Hill Wharf; the work was done by George H. Cavanagh. An estimate was made of the cost of converting a part of Snow's Arch Wharf into a dumping plant; the work was not done.

East Boston Ferries.

North Ferry. At the request of the Superintendent of Streets a report was made on the condition of the piers of the

North Ferry.

South Ferry, East Boston side. Estimates were made for repairing the southerly drop, which was run into by a ferry-boat August 31, and badly damaged. Plans and specifications were later made for replacing the drop with a new one, and the work was let to John M. Brooks for a contract price of \$5,433.50; the new drop was put in use December 31, 1897.

Plans and specifications were made for building a tank for the new drop; the work was done under contract by John M. Brooks

for \$1,737.50.

Plans were made for rebuilding the foundation and the work was done by W. H. Ellis Company. The flooring of the landings was raised to grade 13.50 by the Ferry Division of the Street Department, the extreme raise being 14 inches.

Plans were made for a rearrangement of the landing and piers,

using three drops in place of two.

HARVARD-STREET BRIDGE, OVER NEW ENGLAND RAILROAD.

Plans and specifications were made for building an 8-ft. sidewalk on this bridge; the work was done by the Street Department.

Hyde Park-Avenue Bridge, over Stony Brook.

Plans were prepared for building this bridge, and the work was done by the Street Department.

IPSWICH STREET.

Plans and specifications were completed in November for building the retaining wall and two bridges required for this street. One of the bridges will support the Parkway on Charlesgate West, where it crosses the street, and the other bridge carries the street over the Fens water-way.

On November 29 a contract was made with Messrs. Holbrook, Cabot & Dailey for constructing all the masonry required for the walls and bridges. The work is now in progress, and will be

finished early in the coming season.

STREET DEPARTMENT — ENGINEERING DIVISION. 381

MISCELLANEOUS.

Surveys have been made and plans are being prepared for building foundations for a bridge on Columbia road, over the Old Colony Division of the New York, New Haven and Hartford Railroad.

Surveys have also been made for determining the amount of excavation from the hills on Story and Fifth streets, near H street, South Boston; the earth is being used for filling on Columbia road, at the foot of Mercer street.

Yours respectfully,

WILLIAM JACKSON,

City Engineer.

APPENDIX I.

REPORT OF THE CHIEF SMOKE INSPECTOR.

28 COURT SQUARE, BOSTON, February 1, 1898.

Benj. W. Wells, Esq., Superintendent of Streets:

Dear Sir: I herewith submit a report of the work performed under chapter 389, Acts of 1895, and section 119, chapter 175, Acts of 1897, relating to the Smoke Nuisance in this city.

Under the law of 1895, a chimney could emit "dark or thick gray" smoke for five minutes continuously, or twenty-five per cent. of a continuous period of twelve hours before it was declared a nuisance. There were times at rare intervals when a chimney would emit dark or thick gray smoke for five minutes continuously, but they were so rare that it was thought that the evidence with regard to them would not stand the strain of a trial; and unless the parties complained of felt disposed to make changes at some expense there was no remedy other than taking the case into court, and very little if anything could be done.

Section 119, chapter 175 of the Acts of 1897, provides that "the Building Commissioner may from time to time, after public notice and hearing, prescribe conditions on which any or all boilers may be maintained in buildings, and if any person interested objects to such conditions they shall be referred to a board of appeal, consisting of the Chairman of the Board of Health, Fire Commissioner and the Board of Appeal."

This gives the Building Commissioner the power to make any conditions that are at all fair with regard to the conduct of furnaces burning soft coal, as in some cases the emission of smoke for a much shorter period than the law allows is somewhat of a

nuisance, owing to location, conditions, etc.

In order to take action under this law it is necessary to have a complaint from parties affected; when a complaint is received against an offending stack an observation is taken, and if the chimney is emitting smoke to the annoyance of the parties who complained, but not enough to violate the law, the attention of the owner or parties interested in the plant is called to the complaint and also to the law, and all complaints so far, some of which required time owing to experiments, the department allowing considerable latitude in that direction, have been settled satisfactorily to all parties concerned without bringing the complaint before the Building Commissioner.

Several complaints were also received against house chimneys; these chimneys, while not under the jurisdiction of this office, were looked into, and in some cases the suggestions offered were

carried out, affording considerable relief.

Section 99, chapter 3, Revised Ordinances, 1892, provides that "no person shall use bituminous coal for the purpose of generating steam in boilers in any building, unless the furnace in which said coal is burned is provided with some effectual device for consuming its own smoke."

It was found necessary, if any progress were to be made on the smoke question, to enforce the above ordinance on all new boilers, which has been done for the past three years. Early in August, 1897, the Music Hall Association made application to the Building Commissioner to place and maintain a boiler in Music Hall, and notice was sent them to the effect that the department would object to the granting of the permit unless they complied with the above ordinance. At the expiration of ten days, not having received any reply, a notice of objection was filed with the Building Commissioner, who forwarded the same to the Board of Appeal, who later gave a hearing, the Music Hall Association and the City of Boston being represented by counsel. The decision of the Board of Appeal was to the effect that no permit should be issued until the above parties had complied with the ordinance. This they have since done.

As nothing appeared in the application for boiler permits touching the matter of the use of bituminous coal, the Corporation Counsel, in the latter part of September, drew up a new form of application and permit, calling attention in the application to the fact that if bituminous coal was to be used, the furnace should be provided with a smoke-consuming device. The permit required the device when adopted to be satisfactory to this office; the necessity of this was shown in the fact, that since the enforcement of the ordinance relative to the adoption of smoke consumers, some persons, with a view of evading the law, equipped their boilers with cheap and ineffective devices, which, upon investigation, were found to be short lived and worthless.

There have been times during the past year when the emission of smoke from chimneys has been very noticeable, particularly the past few months. Plants that had previously never given any trouble were reported by the observers, and, upon investigation, were found to be using what is known as a low grade of bituminous coal, containing a large percentage of volatile matter, this coal being considered good for steaming qualities, but making very much smoke. To continue the use of this kind of fuel left the owners of plants liable to become amenable to the law, and when this fact was called to their attention, orders

were immediately given by them to stop the further use of this grade of coal.

The greater portion of this coal was later traced as coming from the coal pockets of the Boston & Maine Railroad at Charlestown, which were burned some time ago. This coal was sold by the underwriters to a syndicate, who in turn sold it to consumers as a high grade coal, at much less than the market price.

During the past two months a visit was made to some eightynine boiler plants, the owners of which having at the time the permit was obtained, agreed to burn anthracite coal. These plants are in the main used only during cold weather, and this investigation was made with a view of determining whether the above conditions were being carried out. Fourteen plants were found burning bituminous coal, three of which were equipped with smoke devices; the remainder were notified they were violating the conditions of their permit, all of whom have since complied with the requirements of the department.

COAL IMPORTATIONS.

The following table shows the number of tons and value of importations of Nova Scotia coal recorded at the port of Boston for the year ending January 31, 1898, the main portion of which is used outside the city limits:

MONTH.	Tons.	Value.
February	5,765	\$9,859
March	4,063	7,015
April	6,174	9,986
May	6,200	10,765
June	3,525	6,059
July	8,123	14,385
August	1,954	3,517
September	2,357	2,357
October	1,552	1,552
November	612	773
December	160	176
January, 1898	1,245	1,245
Total	41,730	\$67,689

Boiler Applications.

During the past year 409 applications were received from the Building Department and disposed of as follows:

 ding Dopter		c com	ci ciro	poseci o	1	LOXXO	• •		
Tubular bo	oilers	, ho	t-wat	er heate	ers,	etc.		289

SPECIAL REPORTS.

The following special reports have been made from time to time:

February 4. Report, with observations, on the plant of the Massachusetts Institute of Technology, Boylston street.

February 12. Report, with observation, on plant of the Homeopathic Hospital, Albany street.

February 18. Report, with observations, on plant of Houghton & Dutton, Tremont street.

February 24. Report, with observations, on plant of the Thomas G. Plant Company, Bickford street, Ward 22.

March 6. Report on complaint against Vose & Sons, Washington, corner Waltham streets.

March 9. Report, with observations, on plant of Houghton & Dutton, Tremont street.

March 27. Report, with observations, on plant of the Blodgett estate, 256 Purchase street.

April 8. Report, with observations, on plant of the Massachusetts Fireproof Storage Warehouse Company, Huntington avenue, Parker and Bryant streets.

April 20. Report on complaint against Park Building, Park square, corner Boylston street.

April 23. Report on complaint against Charles M. Priest (restaurant), 102 Dartmouth street.

April 28. Report, with observation, on plant of Houghton & Dutton, Tremont street.

May 14. Report on complaint against plant of Church Green Electric Lighting Company, Sullivan place.

June 9. Report, with observation, on plant of Bowdoin square Hotel, Bowdoin square.

June 23. Report on complaint against plant of Church Green Electric Lighting Company, Sullivan place.

June 28. Report on complaint againt plant of Minot estate, 9-13 Randolph street.

July 22. Report on complaint against Merello's bakery, 1260

Washington street.

August 17. Report on refusal of Trustees of Music Hall Association to comply with chapter 3, section 99, Revised Ordinances, 1892.

August 26. Report, with observations, on plant of Boston Hotel and Steamboat Laundry Company, 59 West Newton street.

Report on complaint against plant of George W. October 2.

Young & Co. (saw-mill), Albany, corner Dedham street.

October 20. Report on communication from His Honor the Mayor, relative to the smoke nuisance from the plant of George W. Young & Co. (saw-mill), Albany, corner Dedham street.

November 11. Report on complaint against plant of Block

Plant Electric Light Company, Province court.

November 27. Report, with observations, on plant of R. H. White & Co., Washington street.

December 13. Report, with observations, on plant of F. L.

Ames estate, 77 Chauncey street. December 22. Report on complaint against plant of Carter Building, Washington, corner Water street.

Summary.

The following is a brief summary of the work for the year ending January 31, 1898:

Number of boiler permits received					409
Number agreeing to burn hard coal					355
Number of short observations taken			٠.		333
Number of observations lasting from	three	to nine	hou	urs,	40
Number of special reports					24

WEATHER REPORT.

Commencing January 1, 1897, there has been obtained from the Weather Bureau a weekly weather record of the temperature, humidity, character of the day, direction and miles per hour of the wind, and also the general precipitation, showing the nature of the same, when it began and ended, and the amount in inches, as shown by the following table:

Weather report for the week ending...........................
